Subject: Phase I Environmental Site Assessment, Proposed Multi-Use Development including Office, Retail and Condominiums, Located at West Foothill Parkway and West Chase Drive, City of Corona, Riverside County, California; APNs: 275-050-014 and 275-080-041.

INTRODUCTION

LGC Geo-Environmental, Inc. (LGC) is pleased to submit herewith our Phase I Environmental Site Assessment (ESA) report for proposed multi-use development including office, retail and condominiums, located at West Foothill Parkway and West Chase Drive, City of Corona, Riverside County, California. The Property is identified as Assessor's Parcel Numbers (APNs) 275-050-014 and 275-080-041. Our Phase I ESA was performed in accordance with American Society for Testing and Materials (ASTM) Standard E1257-13.

This report also presents and evaluates the results of LGC's site reconnaissance, review of previous reports, historical review, regulatory records review, and other information and documentation.

This Phase I ESA have been performed for the exclusive use and benefit of the addressee identified on the cover of this report, or agents directly specified by the addressee, for the transaction at issue concerning the Property described in this report. This Phase I ESA shall not be used or relied upon by others without the prior written consent of LGC, and of the addressee identified on the cover of this report.

I declare that, to the best of my professional knowledge and belief, I meet the definition of *Environmental Professional* as defined in 40 CFR §312.10. I have the specific qualifications based on education, training and experience to assess a *property* of the nature, history, and setting of the *subject property*. I have developed and performed the All Appropriate Inquiries in conformance with the standard and practices set forth in 40 CFR Part 312.

The objective of this Phase I ESA was to ascertain the potential presence or absence of recognized environmental conditions that could impact the Property, as delineated in the scope of services and limitations identified in this report and in the service agreement. The procedure was to perform reasonable steps in accordance with the existing regulations, currently available technology, and generally accepted environmental consulting practices, to accomplish the stated objective.

Our services were performed using the degree of care and skill ordinarily exercised, under similar circumstances, by reputable engineers and geologists practicing in this or similar localities. No other warranty, expressed or implied, is made as to the conclusions and professional advice included in this report. The surface observations made by LGC are believed representative of the entire project. Sub-surface soil and geologic conditions, however, may be different from our preliminary findings. If this occurs, the changed conditions must be evaluated by the project soils engineer and geologist for alternative recommendations.

The findings of this report are valid as of the present date. Changes in the conditions of a property, however, can and do occur with the passage of time, whether due to natural and/or manmade processes on the Property or adjacent properties.

In addition, changes in applicable or appropriate standards may occur, whether they result from legislation or the broadening of knowledge. Accordingly, the findings of this report may be invalidated wholly or partially by changes outside our control.

CLOSING

It has been a pleasure to be of service to you on this project. Should you have any questions, regarding the contents of this report or should you require additional information, please contact this office at your earliest convenience.

Respectfully submitted,

LGC GEO-ENVIRONMENTAL, INC.

Duncan Walker, CEG 1395
Environmental Professional/Certified Engineering Geologist

EXECUTIVE SUMMARY

Overview – LGC Geo-Environmental, Inc. (LGC) was retained by GF Investments, LLC (GFI) to perform a Phase I Environmental Site Assessment (ESA) for proposed multi-use development including office, retail and condominiums, located at West Foothill Parkway and West Chase Drive, City of Corona, Riverside County, California. The Property is identified as Assessor's Parcel Numbers (APNs) 275-050-014 and 275-080-041.

This Phase I ESA was performed in accordance with the scope and limitations of the *American Society for Testing and Materials (ASTM) Standard E1527-13*. The following summarizes LGC's independent conclusions and best professional judgment based upon information available to us during this Phase I ESA.

The purpose and scope of this Phase I ESA are to make preliminary conclusions regarding potential presence of recognized environmental conditions (RECs), including controlled RECs (CRECs), on, at, in, or to the Property. ASTM defines RECs as the presence or likely presence of hazardous substance or petroleum products on, at, in, or to a property. Historical RECs and de minimis conditions are not considered RECs.

When making any decisions concerning the findings of this Phase I ESA, please also refer to the remainder of this report, which may provide additional information regarding the items below and/or present other items of interest that are not discussed in this Executive Summary.

Property Description – Located along the southwest side of West Foothill Parkway opposite its 'T' intersection with West Chase Drive, the Property consists of two irregular-shaped parcels comprising a total of approximately 17.63 acres. In 2006, the Property was graded for proposed single-family residential development under permit, creating a large pad in the center flanked by a graded slope facing north and northwest. In 2015 and 2016, a large roadcut slope was graded on the northeast portion of the Property for improvement/paving of West Foothill Parkway. The Property is bounded on the northeast by West Foothill Parkway followed by single-family residential parcels and West Chase Drive, on the north and west by vacant parcels, and on the south by a nursery parcel and a vacant parcel.

Property Observations – At the time of our site reconnaissance on December 3, 2019, the Property was vacant. The Property is unfenced, except along its south boundary with the nursery. Primary vehicular access to the Property is via a north access road with a locked gate near its entrance from West Foothill Parkway approximately opposite the 'T' intersection with West Chase Drive. Approximately the first 400 feet of the north access road are paved, and the remainder is dirt. The north access road splits in the north center with the main fork extending southwest and east to the onsite pad, and the other fork extending west to the northwest property corner. There is another (south) access road extending from West Foothill Parkway near the southeast property corner. The south access road also accesses the offsite nursery and has locked gates in two places. The graded pad and onsite dirt access roads are generally cleared of vegetation. Most of the remainder of the Property is covered with annual grasses and/or brush, as well as trees mainly along its west boundary. No stressed vegetation was observed.

There is a tree house, possibly a former homeless shelter, near the northwest property corner. On the ground around the tree house, there is scattered trash which appears to be non-hazardous solid waste. On the access road north of the tree house there is a small area of stained (black) surface soil which is approximately 6 to 8 feet across and several inches deep. The stained soil appears to be residue from a small fire but may also contain petroleum hydrocarbons (oil). There are two lengths of cement pipe near the fork in the north access road in the north center of the Property which were apparently dumped by unknown persons. The pipes are approximately 6-inch inside diameter by approximately 8 to 10 feet long and may be composed of asbestos-cement (transite).

Property Background – Historical aerial photographs of the Property dating back to 1931, as well as historical topographic maps dating back to 1902, were reviewed as part of this Phase I ESA. The Property has apparently always vacant unoccupied land. Agricultural use (orchards) of the adjacent area to the east began prior to 1931, and the area began transitioning to single-family residences in the early 1980s. Nursery use of the parcel adjoining southwest began in the early 2000s. The parcels adjoining west and north, together with the parcel adjoining southeast, have apparently always been vacant land.

Potable Water Source – Corona Department of Public Works (CDPW) records indicate that there is a water main in West Foothill Parkway adjacent to the Property. The Property is not currently connected to CDPW water service.

Public Sewer Source – CDPW records indicate that there is no sewer water main adjacent to the Property, and public sewer service is therefore not currently available to the Property.

Environmental Data Resources Report – LGC utilized Environmental Data Resources, Inc. (EDR) to conduct a search of available environmental databases, records and resources regarding the Property. EDR searched the databases for sites surrounding the Property to meet the requirements of *ASTM Standard E1527-13*. The results of EDR’s research are contained in *The EDR Radius Map™ Report with GeoCheck®, Inquiry 5888607.2s*, dated December 2, 2019. To supplement the EDR Report, LGC additionally reviewed online databases for four environmental agencies.

The Property and adjoining properties are not listed in any of the databases searched by EDR or in the four additional online databases reviewed by LGC. The EDR Report also lists and describes one site located within ASTM-specified search radii surrounding the Property; no sites were identified in the four additional online databases reviewed by LGC. The site identified in the EDR Report is not considered to be a concern as regards the Property.

Findings – A summary of our findings is provided below. Details are not included or fully developed in this section, and the Phase I ESA report must be read in its entirety for a comprehensive understanding of these findings.

- Located along the southwest side of West Foothill Parkway opposite its ‘T’ intersection with West Chase Drive, the Property consists of two irregular-shaped parcels comprising a total of approximately 17.63 acres. The Property is vacant land which was graded beginning in 2006.
- Historical aerial photographs of the Property dating back to 1931, as well as historical topographic maps dating back to 1902, were reviewed as part of this Phase I ESA. The Property has apparently always vacant unoccupied land. Agricultural use of the adjacent area to the east began prior to 1931, and the area began transitioning to single-family residences in the early 1980s.
- The Property and adjoining properties were not identified in the databases in the EDR Report or in the four additional online databases reviewed by LGC.
- No evidence of pesticides or herbicides spills was observed on the Property during our site reconnaissance, and there is no indication that pesticides or herbicides were used on the Property.
- There are two lengths of cement pipe near the north access road fork in the north center of the Property which were apparently dumped by unknown persons. The pipes may be composed of asbestos-cement (transite). No other evidence of current or past storage or use of hazardous materials or petroleum products was identified on the Property during our site reconnaissance and records review.
- There is a small area of stained (black) surface soil along the access road north of the tree house and near the northwest Property corner. The stained soil appears to be residue from a small fire but may also contain petroleum hydrocarbons (oil). No other stained surface soil or other visible evidence of petroleum products or hazardous materials spills was observed on the Property. No stressed vegetation was observed.
- No evidence of aboveground storage tanks was observed on the Property during our site reconnaissance or identified during record review.
- No evidence of underground storage tanks, sumps, clarifiers, or other storage or treatment structures for hazardous materials or petroleum products was observed on the Property during our site reconnaissance or identified during record review.
- No evidence of known regulatory actions, regarding hazardous materials or petroleum products cleanup that have been issued or are being issued for the Property, was identified during our records review.

Opinions – A summary of our opinions is provided below. Details are not included or fully developed in this section, and the Phase I ESA report must be read in its entirety for a comprehensive understanding of these opinions.

- No apparent or potential threat of past or present hazardous material releases exists regarding the Property based on the EDR Report and the Agency Contact and Database Search, including the site identified within the ASTM-specified search radii surrounding the Property.
- A Vapor Encroachment Condition does not exist or is not likely to exist in connection with the Property.
- No RECs, including CRECs, were identified on, at, in, or to the Property.
- No significant data gaps were identified that affect the ability of the Environmental Professional to identify RECs.
- There are no unusual circumstances where greater certainty is required regarding RECs.

Conclusions and Recommendations – LGC has performed a Phase I ESA of the Property in conformance with the scope and limitations of *ASTM E1527-13*. There were no exceptions to, or deletions from *ASTM E1527-13* in conducting this Phase I ESA. This Phase I ESA has revealed no evidence of RECs in connection with the Property.

LGC recommends the following additional environmental assessment and remediation, based on the results of this Phase I ESA:

- The two lengths of cement pipe near the north access road fork in the north center of the Property should be sampled to determine if they are composed of asbestos-cement (transite). If the sample results indicate that the contain asbestos, then the pipes and any visible broken-off pipe pieces should be removed, packaged and disposed of as an asbestos-containing material (ACM) by a properly-licensed contractor. If they are not ACM, then they can be disposed of as non-hazardous solid waste. The pipes are a possible ACM and are therefore not an REC.
- The small area of stained (black) surface soil on the road north of the tree house should be sampled to determine if it contains petroleum hydrocarbons. If the sample results indicate that the contain petroleum hydrocarbons, then the stained soil should be excavated, containerized and disposed of as petroleum hydrocarbon contaminated waste by a properly-licensed contractor. If the stained soil does not contain petroleum hydrocarbons, then it can be disposed of as non-hazardous solid waste. The stained soil comprises an estimated 0.5 cubic yard or less, and it is therefore a de minimis condition which is not an REC.
- The other trash on the Property should be removed and disposed of as non-hazardous solid waste.

Non-Scope Issues – The following Non-Scope Issues, which are outside the scope of *ASTM E1527-13*, were assessed in connection with this Phase I ESA of the Property.

Building construction materials that could contain hazardous materials, including asbestos-containing building materials (ACBMs) and lead-based paint (LBP), were considered during this Phase I ESA. There apparently never have been structures on the Property, and therefore ACBMs and LBP are not considered to be concerns regarding the Property. The two lengths of cement pipe near the north access road fork in the north center of the Property should be sampled to determine if they contain asbestos.

Indoor radon levels on the Property were considered during this Phase I ESA. Available information indicates that the Property is in Radon Zone 2 and has a predicted average indoor radon screening level which is less than or equal to the USEPA's radon action level. Radon is therefore not a concern regarding the Property.

Natural occurrences of asbestos near the Property were considered during this Phase I ESA. Available information indicates that there are no reported natural asbestos occurrences or historic asbestos/prospects mines located within 1 mile of the Property. Natural asbestos occurrences and historic asbestos mines/prospects are therefore not concerns regarding the Property.

1.0 INTRODUCTION

1.1 Purpose

LGC Geo-Environmental, Inc. (LGC) was retained by GF Investments, LLC (GFI) to perform a Phase I Environmental Site Assessment (ESA) for proposed multi-use development including office, retail and condominiums, located at West Foothill Parkway and West Chase Drive, City of Corona, Riverside County, California. The Property is identified as Assessor's Parcel Numbers (APNs) 275-050-014 and 275-080-041.

This Phase I ESA was performed in accordance with the scope and limitations of *American Society for Testing and Materials (ASTM) E1527-13: Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. This Phase I ESA report summarizes LGC's independent conclusions and best professional judgment based upon information available to us during this Phase I ESA.

The purpose and scope of this Phase I ESA are to make preliminary conclusions regarding the potential presence of recognized environmental conditions (RECs), including controlled RECs (CRECs), on, at, in, or to the Property. Historical RECs (HRECs) are not considered RECs. ASTM defines REC as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. de minimis conditions are not recognized environmental conditions."

1.2 Scope of Services

LGC's Scope of Services included the following:

- Reconnaissance of the Property to visually assess current conditions on the Property and adjoining properties.
- Locate and document the potential onsite presence and possible use or storage of hazardous materials or petroleum products, in addition to any signs of surface or subsurface contamination.
- Review of historical aerial photographs and topographic maps.
- Review of available reports and documents previously prepared for the Property.
- Review of the soil and groundwater conditions on the Property.
- Review of available environmental and geologic maps which may have been prepared for the Property.
- Review of state and federal environmental databases regarding the Property and surrounding area.
- Environmental analysis of data to address environmental issues relative to hazardous wastes associated with the Property.
- Review of available regulatory agency files.
- Access to the current purchase price and the fair market value of the Property.

There are no data gaps to *ASTM Standard E1527-13* which affect the ability of the Environmental Professional to identify conditions indicative of releases or threatened releases of hazardous substances on, at, in, or to the Property.

1.3 User Questionnaire

A *User Questionnaire* was completed by Chris Bowen of GFI, a prospective purchaser of the Property and the User of this Phase I ESA, and was returned to LGC (Appendix F). Chris Bowen indicated that: 1) the purchase price/loan amount for the Property reasonably reflects the fair market of the Property, and 2) he had no other information or documents regarding the Property, including no information regarding recorded environmental cleanup liens or Activity and Use Limitations (AULs). Annie Hernaez (GFI) provided LGC with a preliminary title report, which did not identify any recorded environmental cleanup liens or AULs.

1.4 Interviews

LGC interviewed the following, an Interview Log (Appendix F) summarizes these interviews:

- Chris Bowen and Annie Hernaez, GFI (prospective purchaser of the Property), regarding the *User Questionnaire*, preliminary title report, and general information.
- Corona Department of Water and Power, regarding availability of water and sewer service to the Property.

- Corona Department of Public Works (CDPW), regarding availability of water and sewer service to the Property.

2.0 PROPERTY OVERVIEW

2.1 Location and Property Description

Located along the southwest side of West Foothill Parkway opposite its 'T' intersection with West Chase Drive, the Property consists of two irregular-shaped parcels comprising a total of approximately 17.63 acres (Property Location Map, Figure 1). In 2006, the Property was graded for proposed single-family residential development under permit, creating a large pad in the center flanked by a graded slope facing north and northwest. In 2015 and 2016, a large roadcut slope was graded on the northeast portion of the Property for improvement/paving of West Foothill Parkway. The Property is bounded on the northeast by West Foothill Parkway followed by single-family residential parcels and West Chase Drive, on the north and west by vacant parcels, and on the south by a nursery parcel and a vacant parcel.

2.2 Property Observations

At the time of our site reconnaissance on December 3, 2019, the Property was vacant. The Property is unfenced, except along its south boundary with the nursery. Primary vehicular access to the Property is via a north access road with a locked gate near its entrance from West Foothill Parkway approximately opposite the 'T' intersection with West Chase Drive. Approximately the first 400 feet of the north access road are paved, and the remainder is dirt. The north access road splits in the north center with the main fork extending southwest and east to the onsite pad, and the other fork extending west to the northwest property corner. There is another (south) access road extending from West Foothill Parkway near the southeast property corner. The south access road also accesses the offsite nursery and has locked gates in two places. The graded pad and onsite dirt access roads are generally cleared of vegetation. Most of the remainder of the Property is covered with annual grasses and/or brush, as well as trees mainly along its west boundary. No stressed vegetation was observed.

There is a tree house, possibly a former homeless shelter, near the northwest property corner. On the ground around the tree house, there is scattered trash which appears to be non-hazardous solid waste. On the access road north of the tree house there is a small area of stained (black) surface soil which is approximately 6 to 8 feet across and several inches deep. The stained soil appears to be residue from a small fire but may also contain petroleum hydrocarbons (oil). There are two lengths of cement pipe near the fork in the north access road in the north center of the Property which were apparently dumped by unknown persons. The pipes are approximately 6-inch inside diameter by approximately 8 to 10 feet long and may be composed of asbestos-cement (transite).

2.3 Historical Property Description

Historical aerial photographs of the Property dating back to 1931, as well as historical topographic maps dating back to 1902, were reviewed as part of this Phase I ESA. The Property has apparently always vacant unoccupied land. Agricultural use (orchards) of the adjacent area to the east began prior to 1931, and the area began transitioning to single-family residences in the early 1980s. Nursery use of the parcel adjoining southwest began in the early 2000s. The parcels adjoining west and north, together with the parcel adjoining southeast, have apparently always been vacant land.

2.4 Topography

The ground surface on the Property is irregular. There is a graded pad on a ridge crest in the center with descending slopes to the north, northwest, northeast and south. The continuation of the ridge crest ascends toward the west from the pad. Graded slopes descending from the pad toward the north, northwest and northeast are inclined at approximately 2:1 (h:v) or flatter and range to approximately 125 feet high. A natural slope descending from the pad toward the south extends offsite and ranges to approximately 100 feet high. Ground surface elevations on the Property range from approximately 1,233 feet above mean sea level (msl) on the graded pad in the east-center to approximately 1,094 feet above msl near the southeast property corner.

2.5 Geology

Regionally, the Property is within the Peninsular Ranges Geomorphic Province of California. The Peninsular Ranges are characterized by steep, elongated valleys and mountain ranges that trend west and northwest. The

Map base reproduced from Google Earth photo (08/24/2018).

FIGURE 1 PROPERTY LOCATION MAP

GF Investments, LLC, West Foothill Parkway and West Chase Drive, City of Corona, Riverside County, California

Project Name	GF Investments – Corona
Project No.	G19-1802-15
Geologist	DW
Scale	1" = 100'
Date	December 2019

mountainous areas are underlain by Pre-Cretaceous metasedimentary and metavolcanic rocks and Cretaceous plutonic rocks of the Southern California Batholith. The valleys are underlain by young alluvial deposits followed by Quaternary and Tertiary bedrock units (sandstones, mudstones and conglomerates, as well as volcanics). The Property and adjacent area are underlain by bedrock units of the Ladd Formation consisting of silty sandstone with gravel, cobbles and boulders which are white to gray, dry to damp and dense (LGC Inland Inc., 2004).

The northwest-southeast trending topography for the area is controlled by the Elsinore fault zone (EFZ), which extends northwesterly approximately 190 miles from San Diego County through Riverside County to southeastern Los Angeles County. The EFZ separates the Santa Ana Mountains Block on the southwest, which includes the Property, from the Perris Block on the northeast. An active southeast trending trace of the EFZ crosses the Property near the northeast property corner, and there is a State of California Earthquake Fault Zone on the Property in the northeast associated with the EFZ. The Tin Mine fault crosses the Property from west to east near the south property boundary. The Tin Mine fault is not designated as an active fault, but there is a County Fault Zone associated with it. The County Fault Zone associated with the EFZ and the Tin Mine fault covers the entire Property (Riverside County, 2018).

2.6 Groundwater

The California Department of Water Resources (DWR) *Water Data Library* indicates that the nearest well is State Well Number 338729N1175842W001 which is located approximately 2.2 miles north-northeast of the Property. The recorded groundwater depths in this well have ranged from 112 to 201 feet below ground surface (bgs) during 2011 through 2019.

2.7 Potable Water Source

CDPW records indicate that there is a water main in West Foothill Parkway adjacent to the Property. The Property is not currently connected to CDPW water service.

2.8 Public Sewer Source

CDPW records indicate that there is no sewer water main adjacent to the Property, and public sewer service is apparently not currently available to the Property.

3.0 RECORDS REVIEW

3.1 Historical Aerial Photograph Review

The following table describes the historical aerial photographs provided by Environmental Data Resources, Inc. (EDR) that were reviewed during this Phase I ESA (Appendix C). These historical aerial photographs were reviewed for evidence of potential past usage, storage, and/or disposal of hazardous materials or petroleum products on the Property and vicinity, which include, but are not limited to: landfills, oil wells, storage drums, underground storage tanks (USTs), aboveground storage tanks (ASTs), gas stations, agricultural operations known to use pesticides or herbicides, waste disposal pipes, and waste disposal areas.

HISTORICAL AERIAL PHOTOGRAPH REVIEW

Date	Observations
1931	The Property & the surrounding area to the N, W & SE are vacant. Some the nearby area to the E & SW is orchards. A main N-S dirt road & E-trending connector dirt roads are visible.
1938	No significant changes since 1931.
1948	More orchards to the E. No other significant changes since 1938.
1953	No significant changes since 1948.
1959	More orchards to the E. No other significant changes since 1953.
1961	More orchards to the NE. No other significant changes since 1959.
1967	More orchards to the NE. No other significant changes since 1961.
1975	No significant changes since 1967.
1985	Most of the orchards to the NE are gone. No other significant changes since 1975.
1989	Residential tracts have replaced most of the orchards to the NE. No other significant changes since 1985.

Date	Observations
1994	No significant changes since 1989.
2006	The ridge-crest pad, N/NW slopes & access roads have been graded on the Property. The nursery parcel adjoining SW is being developed. More residential tracts are replacing most of the orchards to the N, E, NE & SE. No other significant changes since 1994.
2009	W Foothill Pkwy (paved) extends to near the SE Property corner. Residential tracts have replaced more of the orchards to the SE. No other significant changes since 2006.
2012	Residential tracts have replaced the orchards to the SE. No other significant changes since 2009.
2016	The NE roadcut slope on the Property has been graded & the Property is in approx. current conditions. W Foothill Pkwy & W Chase Dr have been graded NE of the Property. Most of the surrounding area is developed in approx. current conditions. No other significant changes since 2012.

3.2 Historical Topographic Map Review

The following table describes the historical topographic maps provided by EDR that were reviewed during this Phase I ESA (Appendix C). These historical topographic maps were reviewed for evidence of potential past usage, storage, and/or disposal of hazardous materials or petroleum products on the Property and vicinity, which include, but are not limited to: landfills, oil wells, storage drums, USTs, ASTs, gas stations, agricultural operations known to use pesticides or herbicides, waste disposal pipes, and waste disposal areas.

HISTORICAL TOPOGRAPHIC MAP REVIEW

Date	Observations
1902	The Property is apparently vacant. An unnamed road is along the N Property boundary & a structure is N of the road. Many of the current roads are visible to the E & NE.
1942	There is no map coverage for the Property & areas to the N, W & S. No significant changes since 1902 for area to the E with map coverage.
1947	There is an unnamed mine NE of the Property & 3 other unnamed mines to the N & NW. Most of nearby area to the E is orchards. No other significant changes since 1942.
1954	There is an unnamed dirt road the W part of the Property. The nearby mine is gone. There are structures to the E & SE. No other significant changes since 1947.
1967	The dirt road the W part of the Property is gone. There are more structures & a well nearby to the E. There are residential subdivisions N of Ontario Av. No other significant changes since 1954.
1973	There are more residential subdivisions to the N. No other significant changes since 1967.
1982	There is a large unnamed reservoir nearby to the NE. There are more residential subdivisions & a landing strip to the N. No other significant changes since 1973.
1988	No significant changes since 1982.
1997	The large reservoir nearby to the NE is the Oak Street Reservoir. There are more residential subdivisions to the N & NE. No other significant changes since 1988.
2012	The surrounding area is developed in approx. current conditions including most of the current roads except W Foothill Pkwy. The landing strip to the N is gone.

3.3 City Directories

EDR indicated that City Directories listings are available only for adjacent properties on Anza Road (Appendix E). There no City Directories listings for the 55105 Scrub Oak Road address related to the Property, including for 2011 after the Property was developed and presumably occupied.

3.4 Sanborn Insurance Maps

No Sanborn Fire Insurance Maps were available for the Property and surrounding area.

3.5 Assessor's Parcel Number

Riverside County Assessor's Office records indicate that the Property consists of APNs 573-080-071 and 573-080-072.

3.6 Prior Environmental Site Assessment Reports

Based on research and data obtained during this Phase I ESA, there are no records of prior ESA reports regarding the Property, There are, however, records of the following three prior geotechnical reports regarding the Property (Appendix A).

In 2006, LGC Inland Inc. (LGC Inland) provided observation and testing services during rough grading operations for the Property, the results of which are reported in *Geotechnical Report of Rough Grading, Proposed Residential Development, APN 275-050-008 & 275-080-015, Located at 3210 Mangular Avenue, Corona Area, Riverside County, California* (Project No. I04481-30) dated May 19, 2006. LGC Inland stated the following: "The grading generally conformed to the grades and elevations shown on the original grading plan. Earthwork and grading operations were performed in accordance with the recommendations presented in the referenced reports (see References) and the Grading Code of the County of Riverside, California. The completed earthwork has been reviewed and is considered adequate for the construction now planned."

In 2004, LGC Inland conducted a preliminary geotechnical investigation for the Property, the results of which are reported in *Preliminary Geotechnical Investigation for the Proposed 18-Acre Single Family Residence, Chase Drive and Mangular Avenue, Corona Area of Riverside County, California* (Project No. I04481-10) dated August 5, 2004. Four test pits and two fault trenches were excavated, logged and sampled. Soil testing was conducted using soil samples from the four test pits. Groundwater was not encountered in any of the test pits or trenches to a maximum depth of approximately 7 feet bgs. Two faults, which were exposed in the trenches, were judged to be inactive. LGC Inland concluded that the subject property was considered suitable for the proposed residential development from a soils engineering and engineering geologic point of view.

In 2004, LGC Inland conducted a sewage disposal feasibility investigation for the Property, the results of which are reported in *Sewage Disposal Feasibility Report, Proposed Single Family Residence Located on an 18-Acre Site near Chase Drive and Mangular Avenue, Corona area, Riverside County, California* (Project No. I04481-10) dated July 26, 2004. One boring, two trenches and four test pits were excavated, logged and sampled. Percolation testing was conducted in the four test pits, which indicated that there was sufficient area at the subject site to support an onsite wastewater treatment system (OWTS). Groundwater was not encountered in the boring to a maximum depth of approximately 50 feet bgs or in any of the trenches/test pits.

3.7 Environmental Data Resources Report

LGC utilized EDR to conduct a search of available environmental databases, records and resources regarding the Property. EDR searched the databases for sites surrounding the Property to meet the requirements of *ASTM Standard E1527-13*, including ASTM-specified search radii of up to 1.000 mile and data currency. The results of EDR's research are contained in *The EDR Radius Map™ Report with GeoCheck®, Inquiry 5888607.2s*, dated December 2, 2019 (Appendix D). The Government Records Searched and Data Currency Tracking section in EDR's Report describes the databases that were searched, including data currency.

The Property and adjoining properties are not listed in any of the databases searched by EDR. The EDR Report lists and describes the following site located within ASTM-specified search radii surrounding the Property:

MAP FINDINGS SUMMARY – EDR REPORT

EDR MAP ID	SITE NAME	SITE ADDRESS	EDR DATABASE ACRONYMS	REL. ELEV.	DIST. (mi), DIR.
1	HAGADOS RANCH	3466 SKYLINE DR., CORONA	HIST UST	Lower	0.186, ESE

The following is a discussion of the Standard Federal, State, and Tribal Environmental Record Sources (*ASTM Standard E1527-13*), including the above site listed in the EDR Report.

3.7.1 National Priority List (NPL), Proposed NPL, Delisted NPL, and NPL Liens

The NPL is a USEPA listing of uncontrolled or abandoned hazardous waste sites undergoing long-term remedial action under the Superfund Act. The Proposed NPL is a USEPA listing of sites proposed for the NPL. The Delisted NPL is a USEPA listing of sites which were once considered to be NPL sites but have been reviewed and removed from the NPL. This may be because they have been remediated or reevaluated based on additional information. The NPL Liens is a listing of filed notices of Superfund

Liens. No NPL, Proposed NPL or Delisted NPL sites were identified within 1.000 mile of the Property, and no NPL Liens sites were identified within 0.001 mile of the Property.

3.7.2 Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) List

CERCLIS is a USEPA listing of sites that are either proposed or on the NPL and sites that are in the screening and assessment phase for possible inclusion on the NPL. No CERCLIS sites were identified within 0.500 mile of the Property.

3.7.3 CERCLIS No Further Remedial Action Planned (NFRAP) List

CERCLIS-NFRAP is a USEPA listing of CERCLIS sites where following an initial investigation, no contamination was found, contamination was quickly removed, or contamination was not serious enough to require Federal Superfund action or NPL consideration. No CERCLIS-NFRAP sites were identified within 0.500 mile of the Property.

3.7.4 Resource Conservation and Recovery Act (RCRA) Corrective Actions (CORRACTS) List

RCRA CORRACTS is a USEPA listing of RCRA facilities that are undergoing corrective action. Corrective actions may be required beyond the facility's boundary and can be required regardless of when the release occurred. No RCRA CORRACTS sites were identified within 1.000 mile of the Property.

3.7.5 RCRA Non-CORRACTS Treatment, Storage, and Disposal (TSD) Facilities List

USEPA maintains a list of RCRA Non-CORRACTS TSD facilities, which have permits to manage hazardous material. No RCRA Non-CORRACTS TSD facilities were identified within 0.500 mile of the Property.

3.7.6 RCRA Generators List

The RCRA Generators List contains facilities that generate, store, transport, treat, or dispose of hazardous waste. No Generator facilities were identified within 0.250 mile of the Property.

3.7.7 Federal Institutional Control/Engineering Control Registries

Institutional controls and engineering controls are forms of AULs which are an explicit recognition that residual levels of hazardous substances or petroleum products may be present on the Property and unrestricted use of the Property may not be acceptable. The Property was not identified the Federal Institutional Control/Engineering Control Registries Lists.

3.7.8 Emergency Response Notification System (ERNS) List

ERNS is a USEPA listing of reported Comprehensive Environmental Response Compensation and Liability Act (CERCLA) hazardous substance releases or spills in quantities greater than the reportable quantity, as maintained at the National Response Center (NRC). The Property was not identified on the ERNS List.

3.7.9 State- and Tribal-Equivalent NPL (RESPONSE)

The State- and Tribal-Equivalent NPL (RESPONSE) list identifies confirmed release sites where Department of Toxic Substances Control (DTSC) is involved in remediation, either in a lead or oversight capacity. RESPONSE sites are generally high-priority and high potential risk. No RESPONSE sites were identified within 1.000 mile of the Property.

3.7.10 State- and Tribal-Equivalent CERCLIS (ENVIROSTOR)

The ENVIROSTOR database identifies sites that have known contamination or sites for which there may be reasons to investigate further. No ENVIROSTOR sites were identified within 1.000 mile of the Property.

3.7.11 State and Tribal Landfill and/or Solid Waste Disposal Site Lists

The Solid Waste Information System list contains Solid Waste Facilities/Landfill (SWF/LF) site records of Active, Closed and Inactive Landfills. No SWF/LF sites were identified within 0.500 mile of the Property.

3.7.12 State and Tribal Leaking Underground Storage Tank (LUST) Sites

Lists of LUST sites registered with the state (including *GeoTracker*) and USEPA (tribal). No LUST sites were identified within 0.500 mile of the Property.

3.7.13 State and Tribal Registered UST Sites

An inventory of USTs registered with the state (including *GeoTracker*) and USEPA (tribal). No UST sites were identified within 0.250 mile of the Property.

3.7.14 Registered Aboveground Storage Tank Sites

A list of AST sites registered with the State Water Resources Control Board (SWRCB). No registered AST sites were identified within 0.250 mile of the Property.

3.7.15 State and Tribal Voluntary Cleanup Program (VCP) Sites

A listing of low threat level sites with confirmed or unconfirmed releases and the project proponents have requested that DTSC oversee investigation and/or cleanup activities. No VCP sites were identified within 0.500 mile of the Property.

3.7.16 State and Tribal Brownfields Sites

A listing of Brownfields sites which have come to the SWRCB through the Memorandum of Agreement (MOA) Process. No Brownfields sites were identified within 0.500 mile of the Property.

3.7.17 Historical UST (HIST UST) Sites

The Hazardous Substance Storage Container Database is a historical list of UST sites (HIST UST). The EDR Report identified one HIST UST site within 0.250 mile of the Property. Hagados Ranch, 40675 Skyline Drive, Corona, is located approximately 0.186 mile east-southeast of the Property. This HIST UST site is not listed in the *GeoTracker* database, and it is therefore not considered to be a concern regarding the Property due to the following: no leaks or violations reported and/or site location relative to the apparent direction of regional groundwater flow.

3.8 Agency Contact and Database Search

To supplement the EDR Report, LGC reviewed online databases for the following environmental agencies:

- Department of Conservation, Division of Oil, Gas, and Geothermal Resources (DOGGR).
- SWRCB.
- South Coast Air Quality Management District (AQMD).
- DTSC.

3.8.1 Division of Oil, Gas, and Geothermal Resources

The DOGGR *WellFinder* database and map were reviewed online regarding oil and gas wells near the Property. The *WellFinder* map indicates that the nearest oil and gas well is located approximately 1.2 miles north-northwest of the Property. The well is identified as API: 0406500083, Well Number 1, Operator: Edgington Oil Refineries, Inc. This oil and gas well is a plugged dry hole and is not considered to be a concern regarding the Property.

3.8.2 State Water Resources Control Board

The SWRCB *GeoTracker* database and map were reviewed online regarding the Property. The *GeoTracker* database contains information about Permitted USTs, LUST Cleanup Sites, Cleanup Program Sites, Land Disposal Sites, Military Sites, Waste Discharge Requirements (WDR) Sites, and Irrigated Lands Regulatory Program Sites. The *GeoTracker* map indicates there are no Permitted USTs, LUST Cleanup Sites, Cleanup Program Sites, Land Disposal Sites, Military Sites, WDR Sites, and Irrigated Lands Regulatory Program Sites within ASTM-specified search radii surrounding the Property. Therefore, these sites are not considered to be concerns regarding the Property.

3.8.3 South Coast Air Quality Management District

The South Coast AQMD *Facility Information Detail (FIND)* database and map were reviewed online regarding the Property. The *FIND* database contains information about facilities having AQMD permits. Based on the *FIND* map, there are no AQMD permit sites within 0.250 mile of the Property. Therefore, AQMD permit sites are not considered to be concerns regarding the Property.

3.8.4 Department of Toxic Substances Control

The DTSC *ENVIROSTOR* database and map were reviewed online regarding the Property. The *ENVIROSTOR* database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The *ENVIROSTOR* map indicates there are no Federal NPL, State NPL, Voluntary Cleanup, School Cleanup, Evaluation, Military Evaluation, Tiered Permit, and Corrective Action sites within ASTM-specified search radii surrounding the Property. Therefore, these sites are not considered to be concerns regarding the Property.

4.0 SITE RECONNAISSANCE

4.1 Site Reconnaissance Methodology

On December 3, 2019, LGC performed a site reconnaissance of the Property to observe and evaluate its current use and onsite environmental conditions. The site reconnaissance involved walking the Property while observing for evidence of existing and potential environmental concerns. Property photographs are provided in Appendix B.

4.2 Limiting Conditions

LGC encountered no limiting conditions during the site reconnaissance on December 3, 2019.

4.3 Interior Observations of Property

During the site reconnaissance on December 3, 2019, LGC observed no structures on the Property and therefore made no interior observations for the east parcel.

Exterior Observations of Property

During the site reconnaissance on December 3, 2019, LGC made the following observations regarding the exterior of the Property:

EXTERIOR OBSERVATIONS OF PROPERTY

Item or Condition	Observed Evidence	No Evidence Observed	Comments
Hazardous Substances & Petroleum Products:	<input checked="" type="checkbox"/>	<input type="checkbox"/>	There are 2 lengths of cement pipe near the north access road fork in the north center of the Property. The pipes are approximately may be composed of transite (asbestos-cement).
Odors:	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
Storage Tanks & Related Equipment:	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
Standing Surface Water or Other Pools of Liquid:	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
Drums of Hazardous Substances, Petroleum Products, or Unidentified Contents:	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
Transformers or Equipment containing Polychlorinated Biphenyls (PCBs):	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
Pits, Ponds, or Lagoons:	<input type="checkbox"/>	<input checked="" type="checkbox"/>	

Item or Condition	Observed Evidence	No Evidence Observed	Comments
Drains and Sumps:	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
Stained Soil or Pavement:	<input checked="" type="checkbox"/>	<input type="checkbox"/>	A small area of stained (black) surface soil is located north of the tree house near the NW property corner. The stained soil appears to be residue from a small fire but may also include petroleum hydrocarbons (oil).
Stressed Vegetation (other than from insufficient water):	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
Evidence of Mounds, Depressions or Filled or Graded Areas Suggesting Trash or Other Solid Waste Disposal:	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
Wastewater or any discharge (including storm water) into a Drain, Ditch, or Stream on or Adjacent to the Property:	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Most onsite storm water runoff apparently discharges north into the culvert inlet along W. Foothill Pkwy. & NW onto the road shoulder. The remaining onsite storm water runoff apparently discharges south onto the adjoining properties.
Wells (active, inactive, or abandoned):	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
Septic Systems or Cesspools:	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
Prior Structures:	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
Roads, Tracks, Railroad Tracks or Spurs:	<input type="checkbox"/>	<input checked="" type="checkbox"/>	

4.5 Adjoining Property Observations

As defined in *ASTM Standard E1527-13*, an adjoining property is any real property whose border is contiguous or partially contiguous with the Property, or would be contiguous or partially contiguous with the Property if that property were not separated from the Property by a roadway, street or other public thoroughfare.

The Property is bordered by the following:

Northeast: West Foothill Parkway (paved) followed by single-family residential parcels and West Chase Drive.

North: A vacant parcel.

South: A nursery parcel (west) and a vacant parcel (east).

West: A vacant parcel.

5.0 FINDINGS

A summary of our findings is provided below. Details are not included or fully developed in this section, and the Phase I ESA report must be read in its entirety for a comprehensive understanding of these findings.

- Located along the southwest side of West Foothill Parkway opposite its 'T' intersection with West Chase Drive, the Property consists of two irregular-shaped parcels comprising a total of approximately 17.63 acres. The Property is vacant land which was graded beginning in 2006.
- Historical aerial photographs of the Property dating back to 1931, as well as historical topographic maps dating back to 1902, were reviewed as part of this Phase I ESA. The Property has apparently always vacant unoccupied land. Agricultural use of the adjacent area to the east began prior to 1931, and the area began transitioning to single-family residences in the early 1980s.

- The Property and adjoining properties were not identified in the databases in the EDR Report or in the four additional online databases reviewed by LGC.
- No evidence of pesticides or herbicides spills was observed on the Property during our site reconnaissance, and there is no indication that pesticides or herbicides were used on the Property.
- There are two lengths of cement pipe near the north access road fork in the north center of the Property which were apparently dumped by unknown persons. The pipes may be composed of asbestos-cement (transite). No other evidence of current or past storage or use of hazardous materials or petroleum products was identified on the Property during our site reconnaissance and records review.
- There is a small area of stained (black) surface soil along the access road north of the tree house and near the northwest Property corner. The stained soil appears to be residue from a small fire but may also contain petroleum hydrocarbons (oil). No other stained surface soil or other visible evidence of petroleum products or hazardous materials spills was observed on the Property. No stressed vegetation was observed.
- No evidence of ASTs was observed on the Property during our site reconnaissance or identified during record review.
- No evidence of USTs, sumps, clarifiers, or other storage or treatment structures for hazardous materials or petroleum products was observed on the Property during our site reconnaissance or identified during record review.
- No evidence of known regulatory actions, regarding hazardous materials or petroleum products cleanup that have been issued or are being issued for the Property, was identified during our records review.

6.0 OPINIONS

A summary of our opinions is provided below. Details are not included or fully developed in this section, and the Phase I ESA report must be read in its entirety for a comprehensive understanding of these opinions.

- No apparent or potential threat of past or present hazardous material releases exists regarding the Property based on the EDR Report and the Agency Contact and Database Search, including the site identified in the EDR Report within the ASTM-specified search radii surrounding the Property.
- A Vapor Encroachment Condition does not exist or is not likely to exist in connection with the Property.
- No RECs, including CRECs, were identified on, at, in, or to the Property.
- No significant data gaps were identified that affect the ability of the Environmental Professional to identify RECs.
- There are no unusual circumstances where greater certainty is required regarding RECs.

7.0 CONCLUSIONS AND RECOMMENDATIONS

LGC has performed a Phase I ESA of the Property in conformance with the scope and limitations of *ASTM E1527-13*. There were no exceptions to, or deletions from *ASTM E1527-13* in conducting this Phase I ESA. This Phase I ESA has revealed no evidence of RECs in connection with the Property.

LGC recommends the following additional environmental assessment and remediation, based on the results of this Phase I ESA:

- The two lengths of cement pipe near the north access road fork in the north center of the Property should be sampled to determine if they are composed of asbestos-cement (transite). If the sample results indicate that the contain asbestos, then the pipes and any visible broken-off pipe pieces should be removed, packaged and disposed of as an asbestos-containing material (ACM) by a properly-licensed contractor. If they are not ACM, then they can be disposed of as non-hazardous solid waste. The pipes are a possible ACM and are therefore not an REC.
- The small area of stained (black) surface soil on the road north of the tree house should be sampled to determine if it contains petroleum hydrocarbons. If the sample results indicate that the contain petroleum hydrocarbons, then the stained soil should be excavated, containerized and disposed of as petroleum hydrocarbon contaminated waste by a properly-licensed contractor. If the stained soil does not contain petroleum hydrocarbons, then it can be disposed of as non-hazardous solid waste. The stained soil comprises an estimated 0.5 cubic yard or less, and it is therefore a de minimis condition which is not an REC.

- The other trash on the Property should be removed and disposed of as non-hazardous solid waste.

8.0 NON-SCOPE ISSUES

The following Non-Scope Issues, which are outside the scope of *ASTM E1527-13*, were assessed in connection with this Phase I ESA of the Property.

8.1 Building Construction Materials

Building construction materials that could contain hazardous materials, including asbestos-containing building materials (ACBMs) and lead-based paint (LBP), were considered during this Phase I ESA. There apparently never have been structures on the Property, and therefore ACBMs and LBP are not considered to be concerns regarding the Property. The two lengths of cement pipe near the north access road fork in the north center of the Property should be sampled to determine if they contain asbestos.

8.2 Indoor Radon

The *Map of Radon Zones in California*, based on USEPA data, was reviewed online. The map indicates that Riverside County, including the Property, is in Radon Zone 2 and has a predicted average indoor radon screening level between 2 and 4 picocuries per liter (pCi/L), which is considered "Moderate Potential". This screening level is less than or equal to the USEPA's radon action level of 4 pCi/L, and radon is therefore not a concern regarding the Property.

8.3 Natural Asbestos Occurrences

The map of *Reported Historic Asbestos Mines, Historic Asbestos Prospects, and Other Natural Occurrences of Asbestos in California* by the California Geologic Survey (CGS) and U.S. Geologic Survey (USGS) was reviewed. The map depicts historic asbestos mines/prospects and natural asbestos occurrences and indicates that there are no reported natural asbestos occurrences or historic asbestos/prospects mines located within 1 mile of the Property. Natural asbestos occurrences and historic asbestos mines/prospects are therefore not concerns regarding the Property.

9.0 LIMITATIONS

This Phase I ESA was performed using the degree of care and skill ordinarily exercised, under similar circumstances, by reputable engineers, geologists, and environmental professionals practicing in this or similar localities. No other warranty, expressed or implied, is made as to the conclusions and professional advice included in this report. The current observations made in the field and the review of available records and other documentation are believed to be representative of the entire project. However, soil, geologic and other conditions revealed by excavation may be different from our preliminary findings. If this occurs, the changed conditions must be evaluated by the environmental professional, and the recommendations within this Phase I ESA are subject to change. Changes in the conditions of the Property can and do occur with the passage of time, whether they be due to natural processes or the works of man on this or adjacent properties.

This report is issued with the understanding that it is the responsibility of the owner and/or owner's representative to ensure that the information and recommendations contained herein are adhered to and made clear.

The conclusions, opinions and recommendations contained in this Phase I ESA report represent our professional judgment and are based on the results of the described review of available records and other documentation.

The conclusions, opinions and recommendations contained in this Phase I ESA report are valid up to a period of one (1) year from the date of this report in accordance with the All Appropriate Inquiries (AAI) Final Rule. Changes in the conditions on the Property can and do occur with the passage of time, due to natural processes and/or the works of man. In addition, changes in applicable or appropriate codes, regulation and/or standards may occur, whether they result from legislation or the broadening of knowledge. Accordingly, the findings of this Phase I ESA may be invalidated wholly or partially by changed conditions outside LGC's control. Therefore, if any of the abovementioned situations occur, then this report must be updated.

This report has been prepared solely for use by the parties and purposes named and/or designed above. It may not contain sufficient and/or applicable information for use by other parties or other purposes. LGC reserves the right to

the information, conclusions, recommendations, and findings of this Phase I ESA should the client decide to forfeit their ownership of the Property.

LGC appreciates the opportunity to be of service to you and looks forward to the opportunity to work with you in the future. Should you have any questions, or should you require additional information, regarding the contents of this Phase I ESA please do not hesitate to contact this office at your earliest convenience.

10.0 PREPARERS

Duncan Walker
Environmental Professional and Certified Engineering Geologist

B.S., Geology, California University at Los Angeles, 1980.
California Professional Geologist, #4105
California Certified Engineering Geologist, #1395

Environmental Division Manager and Certified Engineering Geologist at LGC. Mr. Walker has more than 30 years of experience in the fields of Environmental Due Diligence including conducting and managing Phase I and Phase II Environmental Site Assessments, as well as Preliminary Environmental Assessments, Supplemental Site Investigations and Removal Action Work Plans/Implementation. Current duties include business development, client liaison, technical oversight, and review and preparation of proposals and reports. Principal areas of responsibility for this Phase I ESA: Project Management, Client Point of Contact, Research, Site Reconnaissance, Interviews, and Report Preparation.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Search Results:

<u>Year</u>	<u>Scale</u>	<u>Details</u>	<u>Source</u>

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by LGCCEOENV were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Registered Storage Tanks

HIST UST: Historical UST Registered Database.

A review of the HIST UST list, as provided by EDR, and dated 10/15/1990 has revealed that there is 1 HIST UST site within approximately 0.25 miles of the target property.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/25/2019	Source: EPA
Date Data Arrived at EDR: 11/07/2019	Telephone: N/A
Date Made Active in Reports: 11/20/2019	Last EDR Contact: 11/07/2019

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/25/2019

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 10/25/2019	Source: EPA
Date Data Arrived at EDR: 11/07/2019	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/24/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/26/2019	Telephone: (415) 495-8895

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/24/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/26/2019	Telephone: (415) 495-8895
Date Made Active in Reports: 10/17/2019	Last EDR Contact: 10/28/2019

	Data Release Frequency: Quarterly

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 06/24/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/26/2019	Telephone: (415) 495-8895
Date Made Active in Reports: 10/17/2019	Last EDR Contact: 10/28/2019
Number of Days to Update: 113	Next Scheduled EDR Contact: 01/06/2020
	Data Release Frequency: Quarterly

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/24/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/26/2019	Telephone: (415) 495-8895

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 08/19/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/20/2019	Telephone: 703-603-0695
Date Made Active in Reports: 08/26/2019	Last EDR Contact: 11/22/2019
Number of Days to Update: 6	Next Scheduled EDR Contact: 03/09/2020
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 08/19/2019	Source: Environmental Protection Agency

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 06/11/2019

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

UTM Y (Meters):	3744883.0
Elevation:	1109 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5636469 CORONA SOUTH, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: SOBOPA

Soil Surface Texture: gravelly loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	gravelly loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Clean Gravels, Well-graded gravel.	Max: 141 Min: 141	Max: 7.8 Min: 6.1
2	9 inches	59 inches	very gravelly sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Clean Gravels, Well-graded gravel.	Max: 141 Min: 141	Max: 7.8 Min: 6.1

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: CIENEBA

Soil Surface Texture: sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0.42 Min: 0	Max: Min:
2	7 inches	11 inches	weathered bedrock	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0.42 Min: 0	Max: Min:

Soil Map ID: 3

Soil Component Name: CORTINA

Soil Surface Texture: gravelly sandy loam

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	22 inches	gravelly sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 141 Min: 42	Max: 8.4 Min: 5.6
2	22 inches	38 inches	stratified very gravelly loamy sand to very gravelly loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 141 Min: 42	Max: 8.4 Min: 5.6
3	38 inches	59 inches	stratified very gravelly sand to very gravelly loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 141 Min: 42	Max: 8.4 Min: 5.6

Soil Map ID: 4

Soil Component Name: CORTINA

Soil Surface Texture: gravelly sandy loam

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK[®] - PHYSICAL SETTING SOURCE SUMMARY

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1921 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

APPENDIX F

USER QUESTIONNAIRE & INTERVIEW LOG

ASTM E1527-13 USER QUESTIONNAIRE

When the "User" (the party for whom the assessment is being prepared) of the Phase I Environmental Site Assessment (ESA) is required to help the Environmental Professional identify recognized environmental conditions at the Property, a "User Questionnaire" is completed by the User to help gather information that may identify recognized environmental conditions (RECs) at the Property.

We ask that you answer the six questions below to the best of your knowledge. We understand that, in some circumstances, you may have little or no information. Still, we encourage you to complete and return the questionnaire as soon as possible. This will allow us to reflect the fact that the Questionnaire was completed when we issue our report as is required. Completion of the assessment to the new ASTM E1527-13 Standard, when conducted in connection with the asset purchase of a real property, may entitle the User to certain federal liability protections that result from conducting "All Appropriate Inquiries" (AAIs) into the previous ownership and uses of a property.

On the second page of this Questionnaire is a list of documentation. The ASTM E1527-13 Standard requires that the User will ensure that the Environmental Professional is made aware that any of these materials exist for the Property, and if so, that these documents will be provided for our review. Please indicate whether any of these documents are available, and ensure that LGC Geo-Environmental, Inc. will either receive copies or be provided an opportunity to review the relevant materials.

We appreciate your assistance. If you have any questions, feel free to contact us.

1. Are you aware of any environmental cleanup liens against the Property that are filed or recorded under federal, tribal, state or local law? Yes No
2. Are you aware of any Activity and Use Limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the Property and/or have been filed or recorded in a registry under federal, tribal, state or local law? Yes No
3. As the User of this ESA do you have any specialized knowledge or experience related to the Property or nearby properties? Yes No For example, are you involved in the same line of business as the current or former occupants of the Property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?
 Yes No
4. Does the purchase price/loan amount for the Property reasonably reflect the fair market of the Property? Yes No If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the Property? Yes No
5. Are you aware of commonly known or reasonably ascertainable information about the Property that would help the environmental professional to identify conditions indicative of releases or threatened releases? Yes No. For example, as User:
 - a. Do you know the past uses of the Property? Yes No
 - b. Do you know of specific chemicals that are present or once were present at the Property?
 Yes No
 - c. Do you know of spills or other chemical releases that have taken place at the Property?
 Yes No
 - d. Do you know of any environmental cleanups that have taken place at the Property?
 Yes No
6. As the User of this ESA, based on your knowledge and experience related to the Property are there any obvious indicators that point to the presence or likely presence of contamination at the Property? Yes No

ASTM E1527-13 USER QUESTIONNAIRE

As part of this study, which of the following are you providing?

- 1 Previous environmental site assessment reports Yes No
- 2 Environmental compliance audit reports Yes No
- 3 Environmental permits (including but not limited to solid waste disposal permits, hazardous waste disposal permits, wastewater permits, NPDES permits, underground injection permits)
 Yes No
- 4 Registrations for underground and aboveground storage tanks Yes No
- 5 Registrations for underground injection systems Yes No
- 6 Material safety data sheets Yes No
- 7 Community Right-to-Know plan Yes No
- 8 Safety plans; preparedness and prevention plans; spill prevention, countermeasure, and control plans; etc. Yes No
- 9 Reports regarding hydrogeologic conditions on the Property or surrounding area
 Yes No
- 10 Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the Property or relating to environmental liens encumbering the Property Yes No
- 11 Hazardous waste generator notices or reports Yes No
- 12 Geotechnical studies Yes No
- 13 Risk assessments Yes No
- 14 Recorded Activity and Use Limitations (AULs). Yes No

Please contact us if you have any questions regarding these ASTM requirements.

Please return the completed document to LGC Geo-Environmental, Inc. via fax at 951-719-2998 or email to duncan@lgcgeoenv.com.

Completed by: Chris Bowen

Signature: 

Title: Managing Member

Company: GF Invesments

Relationship to site
(i.e., lender, purchaser, owner): Buyer

Date: 12/6/2019

Interview Log

12/02/2019 Email to Chris Bowen, GF Investments, LLC (GFI) - prospective purchaser of the Property - <Chris@gfinvestmentsinc.com> and Annie Hernaez <AnnieHernaez@gmail.com>
Emailed *User Questionnaire* and requested preliminary title report.

12/02/2019 Email from Annie Hernaez <AnnieHernaez@gmail.com>
Received preliminary title report.

12/06/2019 Email to Chris Bowen <Chris@gfinvestmentsinc.com> and Annie Hernaez <AnnieHernaez@gmail.com>
Requested completed *User Questionnaire*.

12/06/2019 Email from Chris Bowen <Chris@gfinvestmentsinc.com>
Provided completed/signed *User Questionnaire*. Confirmed that GFI is a prospective purchaser of the Property.

12/06/2019 Phone to Corona Department of Water and Power (CDWP) - 951-739-4983 and 951-279-3768
Leave messages RE availability of water and sewer service to the Property.

12/06/2019 Phone from CDWP - 951-260-2207
Need to contact Corona Department of Public Works (CDPW), regarding availability of water and sewer service to the Property.

12/09/2019 Email to Chris Bowen <Chris@gfinvestmentsinc.com>
Requested clarification of item 6 on the *User Questionnaire*, which was not answered.

12/09/2019 Email from Chris Bowen <Chris@gfinvestmentsinc.com>
Mistakenly did not answer item 6 on the *User Questionnaire*. The answer should have been "No".

12/09/2019 Email to Chris Bowen <Chris@gfinvestmentsinc.com>
Provided corrected *User Questionnaire* to Chris with item 6 marked "No".

12/11/2019 Phone to CDPW - 951-736-2266
There is a water main in West Foothill Parkway adjacent to the Property. The Property is not currently connected to CDWP water service. There is no sewer water main adjacent to the Property, and public sewer service is therefore not currently available to the Property.
