1.0 EXECUTIVE SUMMARY

A Phase I Environmental Site Assessment has been conducted for the Subject Property, a summary of the Findings, Opinion, Conclusions and Recommendations are provided below:

<u>Findings:</u>	<u>Comments</u>
Site Legal Description	The Subject Property consists of one parcel, located at 2895 South Main Street, Corona, CA 92879. The property is identified as APN(s) 113340018.
Subject Property History	From 1931 to 1975, the Subject Property was part of an orchard. By 1985, the residence was developed with the orchards remaining around the residence.
Site Observations	The current use of the Subject Property is a single-family residence and orange orchard.
EDR Findings for Subject Property	The Subject Property was listed in Environmental Records Sources searched under the Hazardous Waste Tracking System (HWTS) database and is discussed in Section 5.2.
EDR Findings for Adjacent Properties	The adjacent properties were not listed in the environmental record sources searched by EDR.
EDR Findings for Surrounding Properties	Surrounding Sites identified as a potential concern are discussed in Section 5.4.
Client Interview (Questionnaire)	Mr. Joe Balbas returned the questionnaire on September 21, 2022. A soil sample test report prepared by Geo-Etka, Inc. was provided for review on September 16, 2022. The questionnaire and soil sample test report are discussed in Section 6.1.
Local Records	No records were found for the Subject Property with the County of Riverside Department of Environmental Health.

<u>Opinions:</u>	<u>Identified?</u>		<u>Comments</u>
	<u>Yes</u>	<u>No</u>	
Recognized Environmental Condition (REC)	X		An aboveground storage tank (AST) is visible in aerial photographs in the middle portion of the Subject Property from 1931 to 1985. The AST is also mapped in the 1967, 1973, 1982, and 1988 historical topographic maps. No records were found to indicate if the AST was used for water or petroleum. Based on the nearby water reservoir and the oil tanks mapped to the east in the historical topographic maps (1954, 1967, 1973, 1982, 1988, and 1997), the AST represents a significant data gap and is a REC.
Historical Recognized Environmental Condition (HREC)		X	No HRECs were identified.
Controlled Recognized Environmental Condition (CREC)		X	No CRECs were identified.
Significant Data Gaps	X		See REC above.

Vapor Intrusion Risk		X	A vapor intrusion risk was not identified for the Subject Property.
De Minimis Condition	X		Based on GEO-ETKA soil test sampling in March of 2022 and the proposed redevelopment of the Subject Property into commercial, the low levels of DDE and DDT detected in shallow soils across the Subject Property are considered a de minimis condition.
Environmental Business Risk		X	No Environmental Business Risks were identified.

Conclusion

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of the Subject Property which consists of one parcel, located at 2895 South Main Street, Corona, CA 92879. The Subject Property is identified as APN(s) 113340018. Any exceptions to, or deletions from, this practice are described in the Limitations Section of this report. This assessment has revealed the following recognized environmental conditions, historical recognized environmental conditions, controlled recognized environmental conditions, and/or significant data gaps in connection with the Subject Property:

- The presence of an aboveground storage tank with unknown use on the middle portion of the Subject Property from 1931 to sometime prior to 1990 represents a Significant Data Gap and is a REC.

Recommendations

Additional Environmental Investigations are recommended at this time. A subsurface investigation in the area of the former aboveground storage tank is recommended to determine if the tank contained petroleum hydrocarbons and if a significant release to the Subject Property has occurred.

2.0 INTRODUCTION

2.1 Location and Legal Description

Subject Property Description	
Subject Property Address:	2895 South Main Street, Corona, CA 92879
Assessor Parcel Number(s):	113340018

A site vicinity map and a generalized location map are located in Appendix 9.2.

2.2 Site and Vicinity General Characteristics

The Subject Property is located in the City of Corona, in Riverside County, California. The site is located approximately 2 miles southwest of the 91 and 15 interchange. The property is located on the northeast corner of the intersection of South Main Street and Chase Drive. The surrounding properties consists of commercial and medical offices to the north and residential properties to the east, south and west.

2.3 Description of Improvements on Property

Property Type	Residential
Land Area (acres)/Source:	4.09-acres/Riverside County Assessor.
Year Constructed:	1985
Building Area (SF)/Source	Main Dwelling: 4,067 SF/Riverside County Assessor. Attached Garage: 1,122 SF/ Riverside County Assessor.
Potable Water Supply	City
Domestic Sewage	City Sewer

The Subject Property consists of an approximately 4.09-acre parcel with an approximately 4,067 SF single family residence with an approximately 1,122 SF attached garage. A roundabout driveway connects the garage and residence to South Main Street. Most of the property is covered in an orange orchard. The remnants of a retaining wall along the middle portion of the Subject Property was observed in both aerial photographs and during the site reconnaissance.

2.4 Current Uses of Adjoining Properties

Direction	Address	Type of Use
North	2813 S Main St, 2815 S Main St	Medical Building/Clinic. Medical Building/Clinic.
East	Not Reported, Multiply residential properties	City of Corona Vacant land. Water Reservoir. Single Family Homes.
South	Multiply residential properties	Single Family Homes.
West	Multiply residential properties	Single Family Homes.

2.5 Purpose

The purpose of this Phase 1 Environmental Site Assessment is to identify to the extent feasible recognized environmental conditions (REC) in connection with the property. Following the processes prescribed by the AAI rule and in ASTM Standard E1527-21, Standard Practice for Environmental Site Assessments: Phase 1 Environmental Site Assessment process.

- ❖ As defined by ASTM E1527-21, §1.1.1, the term "recognized environmental conditions" is defined as follows: *"(1) the presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment. A de minimis condition is not a recognized environmental condition.*
- ❖ As defined by ASTM E1527-21, §3.2.17, the term "controlled recognized environmental condition" is defined as follows: *"Recognized environmental condition affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations)."*
- ❖ As defined by ASTM E1527-21, §3.2.39, the term "historical recognized environmental condition" is defined as follows: *"a previous release of hazardous substances or petroleum products affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the Subject Property to any controls (for example, activity and use limitations or other property use limitations).*

2.6 Detailed Scope-of-Work

The scope of work performed for this Phase 1 Environmental report includes:

- Collecting and reviewing available environmental related information concerning the property and other data pertinent to the specific site per the ASTM standard E1527-21;
- Conducting a site visit to observe current site uses, observe adjacent land use, and gather data on possible spills, or misuse of chemicals that could be considered a REC;
- Contacting appropriate regulatory personnel and reviewing regulatory files regarding the property in question.

No additional non-scope considerations per Section 13 of ASTM E1527-21 were included in this Phase 1 Report including sections 13.1.5.1 to 13.1.5.16.

2.7 Significant Assumptions

No significant assumptions were made in this assessment.

2.8 Limitations and Exceptions

Limitations

This report is applicable only for the project and site studied. Report findings and statements of professional opinion do not constitute a guarantee or warranty, expressed or implied. This report contains information and data provided by others and Priority One Environmental, Inc. in no way warrants the accuracy or completeness of the information provided by those sources. Our services are performed in a manner consistent with the level of care and skill ordinarily exercised by members of the profession currently practicing in the same locality under similar conditions. This report is prepared using the ASTM Standard E1527-21 and includes several inherent limitations, including but not limited to: Section 4.5.1 - Uncertainty Not Eliminated, Section 4.5.2 - Not Exhaustive, Section 7.4 - No Sampling, and Section 7.5.2.1 - Reliance.

Exceptions

No exceptions to or deviations from the ASTM standard E1527-21 were made during the course of our work except for the following:

- *No interviews were conducted with local agencies as part of this assessment. Relevant local agencies for the area have policies of referring requests for interviews to their file review departments.*

These limitations are not anticipated to represent a significant data gap for the investigation.

2.9 Special Terms and Conditions

We have been authorized by Balbas Construction, Inc. to perform a Phase 1 environmental site assessment of the Subject Property. It is our understanding that Balbas Construction, Inc. will use the information contained in the report for due diligence and innocent landowner's protection under Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). Without prior written consent of the client, Priority One Environmental, Inc. will keep confidential and not disclose to any person or entity any data or information provided by the client or generated in conjunction with the performance of this study, except when required by law. Provisions of confidentiality shall not apply to data or information obtained from the public domain or acquired from third parties not under obligation to the client to maintain confidentiality.

2.10 User Reliance

This report was prepared for the exclusive use of Balbas Construction, Inc.. No other person or entity is entitled to rely upon this report without the specific written authorization of Priority One Environmental, Inc. Such reliance is a subject to the same limitations, terms, and conditions as the original contract with the client. Priority One Environmental, Inc. specifically disclaims any responsibility for any unauthorized use of this report. Based on the ASTM standard this Phase 1 report is reliable for 180 days from the date the work was conducted.

3.0 USER PROVIDED INFORMATION

3.1 Title Records

A Preliminary Title Report was not provided for Review.

3.2 Environmental Liens or Activity and Use Limitations

No Additional information was provided identifying actual knowledge of environmental liens or activity and use limitations recorded against the Subject Property. No environmental liens placed by the federal environmental agency under CERCLA regulations for the Subject Property were found during a record search on available government records. The California State Department of Toxic Substances website EnviroStor was searched, and no environmental liens placed by the State environmental agency for the Subject Property was found.

3.3 Specialized Knowledge

No information was provided identifying specialized knowledge or experience that is material to recognized environmental conditions in connection with the Subject Property.

3.4 Commonly Known or Reasonably Ascertainable Information

No information was provided identifying knowledge of commonly known or reasonably ascertainable information related to the Subject Property.

3.5 Valuation Reduction for Environmental Issues

No information was provided identifying knowledge of valuation reduction of the Subject Property.

3.6 Owner, Property Manager, and Occupant Information

Information provided by the owner of the Subject Property is discussed in Section 6 of this report.

3.7 Reason for Performing Phase 1

The Phase 1 has been requested by the client for the use in the development of the property.

3.8 Other

No other information was provided for review related to the Subject Property.

4.0 SUBJECT PROPERTY RECONNAISSANCE

A visual reconnaissance of the Subject Property was conducted on Monday, September 19, 2022, by Mr. Paul Robinson. Photographs of the Subject Property are attached to this report in Appendix 9.1.

4.1 Methodology and Limiting Conditions

The periphery of the Subject Property was inspected. A detailed inspection was conducted of all major site features visible from the public portions of the property.

Limiting Condition	Reason
Interior of Residence/Garage.	Permission to enter not provided.

4.2 Subject Property Reconnaissance

Observations made during the site visit are summarized in the following table:

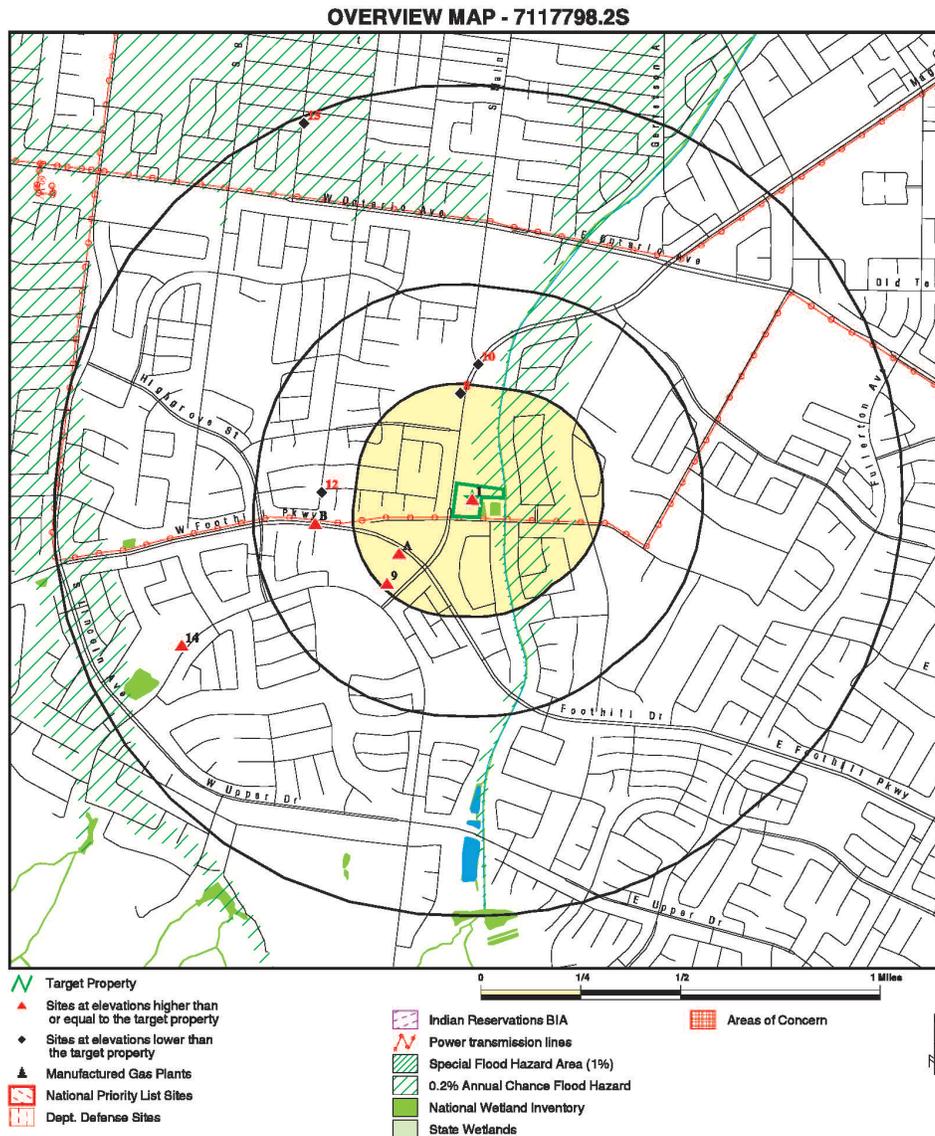

Site Visit Observations	
Current Use(s)	Single Family Residence with orchard.
Past Use(s)	Orchards. The remnants of a retaining wall along the mid portion of the property were observed, the wall is in the area of the from AST observed in both the historical aerial photographs and historical topographic maps.
Current Use of Adjoining Properties	North: Medical office buildings. South: Single Family Homes. East: City of Corona water reservoir and Single-Family Homes. West: Single Family Homes.
Evidence of Past Use of Adjoining Properties	None observed.
Topography	The western portion of the property is relatively flat and the eastern portion slopes to the east towards a Main Street Wash Channel.
Number of Structures	One single family residence with an attached garage.
Roads/Driveways/Parking	Roundabout driveway that connects to South Main Street on the west side of the property.
Potable Water Supply	City water
Solid Waste Disposal	City trash can collection service.
Sewer Discharge and Disposal	City sewer
Surface Water Drainage	The western portion of the property drains to South Main Street. The Eastern portion drains to the channel east of the property.
Source of Heating and Cooling	Ground mounted HVAC units.

Observation Check List			
Type	Observed?		Notes
	Yes	No	
Hazardous Materials and Petroleum Products		X	
Storage Tanks		X	
Strong, Pungent or Noxious Odors		X	
Standing Surface Water and Pools, or Sumps containing liquids likely to be hazardous substances or petroleum products.		X	
Drums, Totes, and Intermediate Bulk Containers		X	
Hazardous Substance and petroleum Product containers not in connection with identified uses		X	
Unidentified Substance Containers.		X	
Polychlorinated Biphenyls (PCBs)		X	
Pole- or Pad mounted Transformers		X	
Stains or Corrosion on Floors, Walls, or Ceilings (not from water)		X	
Area Drains, Floor drains	X		Area drains around the residence to collect stormwater runoff.
Sumps, Drywells, Catch basins, Clarifiers		X	
Pits, Ponds, Lagoons		X	
Stained Soil or Pavement		X	
Stressed Vegetation		X	
Water/Wastewater or other liquid discharged from or to the Subject Property.		X	
Wells (irrigation wells, injection wells, monitoring wells, abandoned wells, or other wells).		X	
Septic System or Cesspools.		X	

5.0 RECORDS REVIEW

5.1 EDR Map Findings

The Subject Property is located at 2895 South Main Street, Corona, CA 92879. The property is identified as APN(s) 113340018. The Subject Property was listed in the Environmental Records searched under the HWTS database.

This report includes Interactive Map Layers to display and/or hide map information. The legend includes only those icons for the default map view.

MAP FINDINGS SUMMARY

Database	Search Distance (Miles)	Target Property	< 1/8	1/8 - 1/4	1/4 - 1/2	1/2 - 1	> 1	Total Plotted
----------	-------------------------	-----------------	-------	-----------	-----------	---------	-----	---------------

NOTES:

- TP = Target Property
- NR = Not Requested at this Search Distance
- Sites may be listed in more than one database

Snipped from EDR Radius Report.

For the full name, description, and the date each of the databases was last updated, please refer to the Government Record section of the EDR® Report.

5.2 Subject Property

EDR Reports the site was listed in the following databases: HWTS. This listing is discussed below:

Database Name	Database Description	Comments
HWTS	<p><u>Hazardous Waste Tracking System</u> - DTSC maintains the Hazardous Waste Tracking System that stores ID number information since the early 1980s and</p> <p>manifest data since 1993. The system collects both manifest copies from the generator and destination facility.</p>	<p>1X Tom’s Farms. Create Date: May 5, 1987, inactive as of October 25, 2000. Facility type: Temporary.</p>

5.3 Adjacent Properties

The adjacent properties were not listed in the environmental record sources searched by EDR.

5.4 Surrounding Properties

EDR Radius Report was reviewed for sites of potential concern to the Subject Property. Sites identified as a potential concern are discussed below:

Site Name(s)	Address	Distance	Databases
Chevron Station No. 207496	130 West Foothill Parkway	826 FT, SW	HWTS, RCRA-SQG, FINDS, HAZNET, CERS HAZ WASTE, CERS TANKS, CERS, UST
<p>This site is an active gasoline service station and appears to have been developed between 1994 and 2002. The UST database reports a total of 3 underground storage tanks. CERS reports the site under the Hazardous Waste Generator, Underground Storage Tank and Chemical Storage Facilities programs. 8 violations were reported under the CERS database. All 8 have achieved compliance with the last violation being reported on December 9, 2020 and returned to compliance on January 18, 2021.</p> <p>No releases have been reported. According to a case closure summary located on GEOTRACKER for 510 Foothill Parkway located to the west-northwest of this case, groundwater is reported to be greater than 100 feet below ground surface; therefore, based on no reported releases and depth to groundwater this site is not anticipated to impact the Subject Property.</p>			

The remaining cases listed in the EDR Database Report were for regulatory database listings, permitted facilities listings, closed/remediated cases, and historical database listings; including sites which, based on indicated groundwater directional flow and their distances, are not anticipated to impact the Subject Property.

5.5 Orphan Properties

Two (2) orphan sites were reviewed and are discussed below:

- WU Property, Fieldstone Communities is located at the SE corner of Montoya Drive and Taylor Avenue, Corona, CA. Approximately ½ mile to the northwest of the Subject Property. The site is listed under the ENVIROSTOR database as refer 1248 local agency. Site type is listed as Evaluation. The status date is 2004. No other relevant information was listed. Based on the distance and topography this site is not anticipated to impact the Subject Property.
- Lyon/Copley Corona Asso. L.P. is located along Main Street, Corona, CA. ENVIROSTOR and GEOTRACKER were reviewed for cases in the area of the Subject Property. The extract location was not determined. The case is listed as a soil only case and is closed. Based on the closed case, this site is not anticipated to impact the Subject Property at this time.

5.6 Physical Setting Sources

According to the most recent USGS Topographic map covering Subject Property and vicinity, the Subject Property western portion is relevantly level with the eastern portion sloping downward to the east. The center of the property lies at approximately 1,038 feet above sea-level. The regional topography slopes to the north.

According to EDR GEOCHECK the site is mapped as a loam soils with a Hydrologic Group Classification of Classes A and B. The western portion of the property is listed as Class B, which is defined as soils with Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures. The soils

have a low corrosion potential versus uncoated steel. The eastern portion of the property is listed as Class A, which is defined as soils with high infiltration rates. Soils are deep, well drained to excessively drained sands and gravels. The soils have a low corrosion potential versus uncoated steel.

GEOTRACKER: According to a case closure summary located on GEOTRACKER for 510 Foothill Parkway located approximately 1,800 feet to the west of the Subject Property, groundwater is reported to be greater than 100 feet below ground surface.

5.7 Sanborn Insurance Maps

An attempt was made by EDR to obtain Sanborn Insurance Company maps for the period covering the years 1860 through the present in order to determine what types of activities were conducted on the Subject Property and on adjoining properties. No Sanborn maps were found.

5.8 Historical Aerial Photographs

Aerial photographs of the Subject Property provided by EDR were reviewed as part of this investigation.

Aerial Photograph Dates:	1931, 1938, 1948, 1953, 1959, 1961, 1967, 1975, 1985, 1989, 1990, 1994, 2002, 2006, 2009, 2012, 2016
--------------------------	--

Subject Property	Description
	In 1931, a circular above ground tank existed in the middle portion of the property north of the reservoir structure to the east-southeast. From 1931 to 1975, the Subject Property is part of an orchard. By 1985, the existing residence was developed. By 1990, the AST located in the middle portion of the property is no longer visible. The residence and orchard appear similar from 1990 to 2016.

Property to	Description
North	From 1931 to 1975, the property to the north is orchards. By 1985, a single-family residence was developed on the property to the north. The residence and orchard appear similar from 1990 to 2009. By 2012, the residence and orchard have been removed and the northwest medical office building and western parking lot have been developed. Between 2017 and 2018 the eastern medical office building and parking lot were developed.

Property to	Description
East	In 1931, the property to the east is an existing reservoir and orchard property and appears similar from 1938 to 1948. By 1953, the orchard east of the reservoir has been cleared and is vacant land. The properties to the east appear similar from 1959 to 1994. By 2002, the residential tract to the east has been developed.

Property to	Description
South	From 1931 to 1975, the property to the south of Chase Drive is orchards. By 1985, the orchards have been cleared and the property south of Chase Drive is vacant land. In 1989 and 1990, the property to the south is being used as row crops. By 1994, the property to the south is being graded. By 2002, the tract of single-family homes to the south had been developed and appear similar from 2006 to 2016.

Property to	Description
West	The property to the west is orchards from 1931 to 1959. By 1961, a single-family residence has been developed to the west. The properties to the west appear similar from 1967 to 1994. By 2002, the single-family home and orchards have been cleared and the tract of single-family homes to the west had been developed.

Surrounding Properties	Description
	The surrounding area is predominantly orchard properties from 1931 to 1975. By 1985, some commercial development has occurred to the north. Between 1994 and 2002, most of the surrounding area was redeveloped into tracts of single-family homes and commercial shopping centers.

These photos are included in the Appendix.

5.9 Historical Topographic Maps

Topographic maps of the Subject Property provided by EDR were reviewed as part of this investigation.

YEAR(S)	DESCRIPTION.
1902	A creek is mapped in the area of the Subject Property. The topography trends to the north with the elevation of the Subject Property, approximately 1,000 feet above sea level.
1942, 1947	In 1942, South Main and Chase Drive existed adjacent to the west and south. The adjacent reservoir to the east is mapped. A railroad track is mapped along the eastern edge of the Subject Property which extends to the south to several rectangle structures.
1947	In 1947, the Subject Property is mapped as orchards. The railroad track is mapped to the east.
1954	In 1954, the railroad tracks no longer existing, Main Street Wash is mapped on the eastern edge of the property with a dirt road to the east of the wash. East of the road is mapped two oil tanks.
1967, 1973	In 1967, a tank is mapped on the mid portion of the Subject Property northwest of the water reservoir. The two tanks east of the dirt road east of the wash are still mapped. A second larger water reservoir has been added east of the original.
1982	Appears similar to previous date.
1987, 1988	The Subject Property residence and residence to the north are mapped. The tank on the mid portion of the Subject Property is still mapped.
1997	The tank in the mid portion of the property is no longer mapped.
2012, 2015, 2018	Current Topographic Map.

These maps are included in the Appendix.

5.10 City Directories

A search of local historical city directories was conducted by EDR for the Subject Property. The review included directories in five-year intervals from 1920 to 2014 (as available).

2895 SOUTH MAIN STREET, CORONA, CA 92879 (SUBJECT PROPERTY)	
YEAR(S)	LISTED USES.
1999-2017	Joseph Santoro.

No additional records were identified for the Subject Property based on the address provided. The surrounding properties are listed in detail in the attached Directory Search.

5.11 Historical Review Summary

Based on a review of the EDR provided Aerial Photographs, Topographic Maps, and City Directories, in 1931, the Subject Property was orchards with an above ground storage tank (AST) in the middle portion of the Subject Property. The orchards and tank existed from 1931 to 1985. In 1985, the existing single-family residence was developed. By 1990, the AST is no longer visible. The orchards have remained on the property from 1990 to the present day. From 1999-2017, the Subject Property is listed under the name Joseph Santoro.

6.0 INTERVIEWS

An attempt has been made to obtain historical as well as current information relative to the Subject Property from several individuals and local agencies. The objective of the interview process is to obtain any information indicating recognized environmental conditions in connection with the Subject Property.

6.1 Interview with Owner or Site Manager

An Environmental Questionnaire and Disclosure Statement were sent to Mr. Joe Balbas on Wednesday, September 14, 2022. The questionnaire was returned on September 21, 2022. The purpose of the Phase I ESA is for redevelopment of the property into a gym. Mr. Balbas provided a soil sample test result report by Geo-Etka, Inc. This report was reviewed and discussed below:

Six samples were collected from the upper 6 to 10 inches from random locations. Results: DDD (compound degrades from DDT), PCBs, and Chlorinated Herbicides were non-detect. DDT and DDE (degrades from DDT) were detected, the levels are summarized below:

Compound	Sample 1	Sample 2	Sample 3	Sample 4	Sample 5	Sample 6	Residential Screening Levels
4,4'-DDE	0.480 ppm	0.630 ppm	0.470 ppm	0.701 ppm	0.700 ppm	0.380 ppm	1.8 ppm
4,4'-DDT	0.190 ppm	0.490 ppm	0.190 ppm	0.200 ppm	0.320 ppm	0.033 ppm	1.9 ppm

Based on a low level detected and proposed redevelopment of the Subject Property into commercial, this is not a significant release to the Subject Property and is considered a de minimis condition.

6.2 Interview with Local Government Officials

County Assessor Office

According to the Riverside County Assessor, the Subject Property consists of one parcel of land totaling approximately 4.09-acre identified by the Riverside County Assessor as Assessor's Parcel Numbers (APNs) 113340018. The last sale occurred in 2022. The existing single-family home was constructed in 1985 and consists of a 4,067 SF single family residence with a 1,122 SF attached garage.

Riverside County Department of Environmental Health

The Riverside County Department of Environmental Health was contacted as part of the records review of the Subject Property. No records were found.

City of Corona

The City of Corona was contacted as part of the records review of the Subject Property; however, the offices have not responded as of the date of this report.

South Coast Air Quality Management District

The South Coast Air Quality Management District FINDS database was reviewed for the Subject Property (<https://www.aqmd.gov/nav/FIND>). The Subject Property was not found.

GEOTRACKER/ENVIROSTOR Database Review

The GEOTRACKER database (<https://geotracker.waterboards.ca.gov/>) and the ENVIROSTOR database (<https://www.envirostor.dtsc.ca.gov/public/>) were reviewed for any additional information available in regards to the Subject Property. Additional information was located for the Subject Property and is discussed below. If additional information was found for the adjacent properties or surrounding properties, these cases are discussed in Section 5.3 and/or 5.4.

CalEPA Regulated Site Portal (CERS)

The CalEPA Regulated Site Portal (<https://siteportal.calepa.ca.gov/nsite/map/help>) was reviewed for the Subject Property and adjacent properties. If the Subject Property or adjacent properties were listed, these listings are discussed in Sections 5.2 and 5.3.

Interview with Others

No additional interviews were conducted in this assessment.

7.0 NON-SCOPE SERVICES

No additional services as listed in the ASTM Standard E1527-21 have been requested in writing and placed under contract in regard to this assessment. Including, but not limited to, asbestos testing of material at the site and drug lab uses of the site.

8.0 EVALUATIONS

8.1 Findings

- 1) **Site Legal Description:** The Subject Property consists of one parcel, located at 2895 South Main Street, Corona, CA 92879. The property is identified as APN(s) 113340018.
- 2) **Site History:** In 1931, the Subject Property was orchards with an above ground storage tank (AST) in the middle portion of the Subject Property. The orchards and tank existed from 1931 to 1985. In 1985, the existing single-family residence was developed. By 1990, the AST is no longer visible. The orchards have remained on the property from 1990 to present day. From 1999 to 2017, the Subject Property is listed under the name Joseph Santoro.
- 3) **Site Observation:** The current use of the Subject Property is a single-family residence and orange orchard.
- 4) **EDR Findings for Subject Property:** The Subject Property was listed in Environmental Records Sources searched under the HWTS database.
- 5) **EDR Radius Report Findings:** The adjacent properties were not listed in the environmental record sources searched by EDR. Surrounding Sites identified as a potential concern are discussed in Section 5.4.
- 6) **Local Records Review:** No records were found for the Subject Property with the Riverside County Department of Environmental Health.

8.2 Opinions

- 7) **Recognized Environmental Condition (REC)** is (1) The presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment. A de minimis condition is not a recognized environmental condition.

After review of the available records and data collected during this Phase I ESA in the timeframe requested, the following RECs were identified and, based on the ASTM International E1527-21 Phase I Standard, require further investigation in order to obtain Landowner Liability Protections (LLPs):

Landowner liability protections under CERCLA include the bona fide prospective purchaser liability protection, contiguous property owner liability protection, and innocent landowner defense from CERCLA liability.

- An aboveground storage tank (AST) is visible in aerial photographs in the middle portion of the Subject Property from 1931 to 1985. The AST is also mapped in the 1967, 1973, 1982, and 1988 historical topographic maps. No records were found to indicate if the AST was used for water or petroleum. Based on the nearby water reservoir and the oil tanks mapped to the east in the historical topographic maps (1954, 1967, 1973, 1982, 1988, and 1997), the AST represents a significant data gap and is a REC.

- 8) **Historical Recognized Environmental Condition (HREC)** is a past release of any hazardous substances or petroleum products that has occurred in connection with the Property and has been addressed to the

satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the Property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

Based on the Findings of this Phase I ESA, no HRECs were identified.

- 9) **Controlled Recognized Environmental Condition (CREC):** A controlled recognized environmental condition is a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action (NFA) letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place, subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

Based on the Findings of this Phase I ESA, no CRECs were identified.

- 10) **Significant Data Gaps:** Data Gaps are a lack of—or inability to—obtain information required by this practice, despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to, site reconnaissance. Data gaps are only significant if other information and/or professional experience raises reasonable concerns involving the data gaps. Significant data gaps may not include the exceptions identified in Section 2.8 of this report (Limitations and Exceptions).

After review of the available records and data collected during this Phase I ESA in the timeframe requested, the following significant data gaps were identified and could limit the Environmental Professional's ability to identify all RECs, HRECs, CRECs, or other possible issues with the Subject Property:

- An aboveground storage tank (AST) is visible in aerial photographs in the middle portion of the Subject Property from 1931 to 1985. The AST is also mapped in the 1967, 1973, 1982, and 1988 historical topographic maps. No records were found to indicate if the AST was used for water or petroleum. Based on the nearby water reservoir and the oil tanks mapped to the east in the historical topographic maps (1954, 1967, 1973, 1982, 1988, and 1997), the AST represents a significant data gap and is a REC.

- 11) **Vapor Intrusion Risk:** A vapor intrusion risk was not identified during this assessment.
- 12) **De Minimis Condition:** Based on GEO-ETKA soil test sampling in March 2022, and proposed redevelopment of the Subject Property into commercial, the low levels of DDE and DDT detected in shallow soils across the property are considered a de minimis condition.
- 13) **Environmental Business Risks:** An Environmental Business Risk (EBR) is a risk which can have a material environmental or environmentally driven impact on the business associated with the current or planned use of commercial real estate and is not an issue required to be investigated based on the ASTM International E1527-21 Standard.

Based on the Findings of this Phase I ESA, no EBRs were identified.

8.3 Conclusions

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of the Subject Property which consists of one parcel, located at 2895 South Main Street, Corona, CA 92879. The Subject Property is identified as APN(s) 113340018. Any exceptions to, or deletions from, this practice are described in the Limitations Section of this report. This assessment has revealed the following recognized environmental conditions, historical recognized environmental conditions, controlled recognized environmental conditions, and/or significant data gaps in connection with the Subject Property:

- The presence of an aboveground storage tank with unknown use on the middle portion of the Subject Property from 1931 to sometime prior to 1990 represents a Significant Data Gap and is a REC.

8.4 Recommendations

Additional Environmental Investigations are recommended at this time. A subsurface investigation in the area of the former aboveground storage tank is recommended to determine if the tank contained petroleum hydrocarbons and if a significant release to the Subject Property has occurred.

8.5 Professional Signature

According to Code of Federal Regulations C.F.R. - Title 40 §312.10, Environmental Professional is defined as:

"(1) a person who possess sufficient specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases (see §312.1(c)) on, at, in, or to a property, sufficient to meet the objectives and performance factors in §312.20(e) and (f).

(2) Such a person must:

(i) hold a current professional engineer's or Professional Geologist's license or registration from a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) and have the equivalent of three (3) years of full-time relevant experience; or

(ii) Be licensed or certified by the federal government, a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) to perform environmental inquiries as defined in §312.21 and have the equivalent of three (3) years of full-time relevant experience; or

(iii) Have a Baccalaureate or higher degree from an accredited institution of higher education in a discipline of engineering or science and the equivalent of five (5) years of full-time relevant experience; or

(iv) Have the equivalent of ten (10) years of full-time relevant experience".

We declare to the best of our professional knowledge and belief, we have met the definition of Environmental Professional as defined in §312.10 of 40 C.F.R. 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 C.F.R. 312.

It has been a pleasure to be of service. If any questions arise, please contact our office.

Sincerely,

Paul J. Robinson
Environmental Professional
Priority One Environmental, Inc.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Priority One Environmental, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Priority One Environmental, Inc. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Priority One Environmental, Inc. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/20/2022 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>CHEVRON STATION NO 2</i> EPA ID:: CAR000118430	<i>130 W FOOTHILL PKWY</i>	<i>SW 1/8 - 1/4 (0.156 mi.)</i>	<i>A2</i>	<i>9</i>

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 06/20/2022 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/25/2022 has revealed that there are 4 ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal leaking storage tanks

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 2 LUST sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 2 UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/20/2022 has revealed that there are 2 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>ALBERTSON'S # 6728</i> <i>EPA ID:: CAL000384631</i>	<i>260 W FOOTHILL PKWY</i>	<i>SW 1/8 - 1/4 (0.163 mi.)</i>	<i>A6</i>	<i>61</i>

Completed Date: 01/13/2009
Comments: DTSC issued a further action determination after reviewing the final PEA Report. In addition, the letter included partial site approval per the District's request. An approved CDE 4.15 form was also granted. A supplemental site investigation was not required, the District will move forward with a removal action since the extent of the contamination was defined during the PEA investigation.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date Data Arrived at EDR: 08/02/2022	Telephone: N/A
Date Made Active in Reports: 08/22/2022	Last EDR Contact: 09/01/2022
Number of Days to Update: 20	Next Scheduled EDR Contact: 10/10/2022
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Next Scheduled EDR Contact: 10/24/2022
Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 07/26/2022	Source: EPA
Date Data Arrived at EDR: 08/02/2022	Telephone: 800-424-9346

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/20/2022	Source: Environmental Protection Agency

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/20/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/21/2022	Telephone: (415) 495-8895

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 06/20/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/21/2022	Telephone: (415) 495-8895

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/20/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/21/2022	Telephone: (415) 495-8895

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

GEOCHECK[®] - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

P1E-22-09-07
2895 S MAIN ST
CORONA, CA 92879

TARGET PROPERTY COORDINATES

Latitude (North):	33.846356 - 33° 50' 46.88"
Longitude (West):	117.569935 - 117° 34' 11.77"
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	447271.7
UTM Y (Meters):	3745072.5
Elevation:	1038 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	12015885 CORONA SOUTH, CA
Version Date:	2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

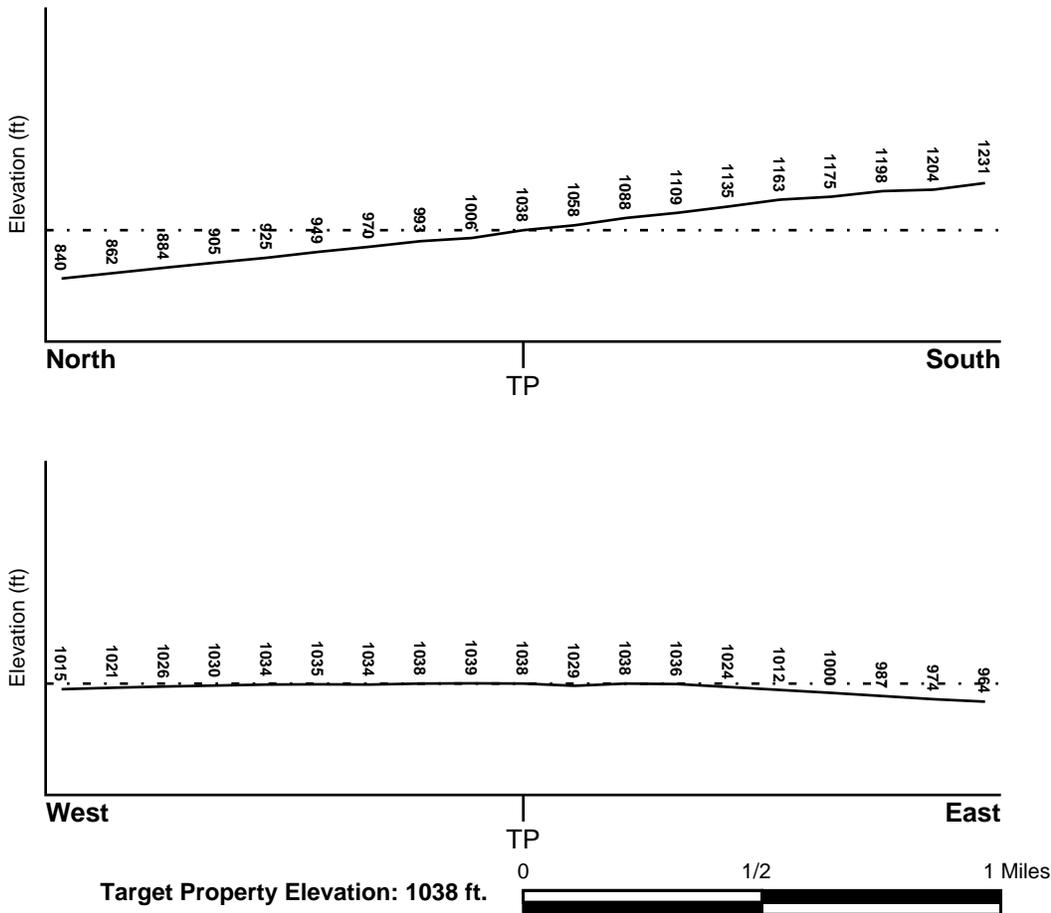

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
NOT AVAILABLE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: GARRETSON

Soil Surface Texture: gravelly very fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	gravelly very fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14 Min: 4	Max: 7.8 Min: 6.1
2	9 inches	53 inches	gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14 Min: 4	Max: 7.8 Min: 6.1
3	53 inches	72 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14 Min: 4	Max: 7.8 Min: 6.1

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: CORTINA

Soil Surface Texture: gravelly sandy loam

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	22 inches	gravelly sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 141 Min: 42	Max: 8.4 Min: 5.6
2	22 inches	38 inches	stratified very gravelly loamy sand to very gravelly loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 141 Min: 42	Max: 8.4 Min: 5.6
3	38 inches	59 inches	stratified very gravelly sand to very gravelly loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 141 Min: 42	Max: 8.4 Min: 5.6

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1921 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Balbas Construction, Inc.
3189 Airway Avenue, Unit D
Costa Mesa, California 92626

Attention: Mr. Job Balbas:

Subject: Soil Sample Test Results for Organochlorine Pesticide,
PCBs, and Chlorinated Herbicides,
Geo-Etka, Inc. Project No.: T-11936-22

Project: Proposed are Three (3) Commercial Buildings
2895 South Main Street, Corona, California 92881

Reference: Geo-Etka, Inc., "Preliminary Soil Investigation Report, Proposed
Three Commercial Buildings, 2895 South Main Street, Corona,
California." Project Number FP-11936-22, Report Dated February
28, 2022.

Dear Mr. Balbas,

In accordance with your authorization, we have sampled onsite surficial soils for Organochlorine Pesticide and its breakdown compounds, PCBs, and for Chlorinated Herbicides for the above referenced project. Six samples were collected from the upper 6 to 10 inches from random locations. The samples were placed in plastic containers, sealed, labeled, and stored in an ice-cooled chest. The sample was transported to E.S.B Environmental Laboratories in Riverside, California, a CalEPA/DHS certified Hazardous Waste Testing Laboratory. Chain of custody document is included rear of test results. The testing was conducted in general accordance of EPA 8000 series and EPA 8151A.

The attached test results show “No Detection” for DDD (compound degrades from DDT), PCBs, and Chlorinated Herbicides. Detection was recorded for DDT and DDE (compound degrades from DDT). The detected levels are less than 1 ppm. Detected levels are summarized below.

Compound	Sample 1	Sample 2	Sample 3	Sample 4	Sample 5	Sample 6
4,4'-DDE	0.480 ppm	0.630 ppm	0.470 ppm	0.701 ppm	0.700 ppm	0.380 ppm
4,4'-DDT	0.190 ppm	0.490 ppm	0.190 ppm	0.200 ppm	0.320 ppm	0.033 ppm

Based on available information from the National Toxicology Program (NTP), the Hazardous Substances Data Bank (HSDB), and the National Library of Medicine (NIH), we found that “acceptable risk range” for tested animal range from 79.6 ppm to 113 ppm for these substances.

According to Risk Assessment Guidance for Superfund (RAGS), the calculated lifetime average concentrations of DDT in soil corresponding to the “no-significant risk level” for residential exposure, states that the concentration of DDT in soil corresponding to a “no-significant-risk” ranges from 7.9-18.8 ppm.

Based on the pesticide/PCBs/herbicide test results, the levels of these substances in onsite surficial soils are considered within acceptable risk range when compared to available information from various agencies. Nevertheless, we recommend placing existing surficial soils (upper 12 inches) in bottom of deeper fill areas during grading.

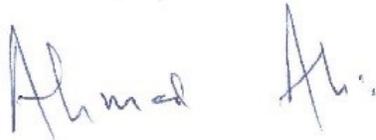

Our findings, and conclusions are normally limited to the samples collected and the area immediately surrounded each sample collection point. The work was performed in accordance with professional practices and standards currently accepted in the industry at the time our work was completed. No other warranty is either expressed or implied.

Questions, if any, regarding this report should be directed to our office.

Respectfully submitted,
GEO-ETKA, INC.

Attached is the analytical report for the sample(s) received for your project. Below is a list of the individual sample descriptions with the corresponding laboratory number(s). Also, enclosed is a copy of the Chain of Custody document (if received with your sample(s)). Please note any unused portion of the sample(s) may be responsibly discarded after 30 days from the above report date, unless you have requested otherwise.

Thank you for the opportunity to serve your analytical needs. If you have any questions or concerns regarding this report please contact our client service department.

Notes and Definitions

- N_RLm Due to sample matrix, the reporting limit has been raised.
NCALhNI Calibration Verification recovery was above the method control limit for this analyte. Analyte not detected, therefore data not impacted.
NCALI The sample result(s) are estimate(s). The instrument calibration verification result(s) were below laboratory acceptance criteria.
NCALIm Calibration Verification recovery was below the method control limits for this analyte due to matrix interference carried over from analytical samples.
NCALInd Calibration Verification recovery was below the method control limit for this analyte. An additional check standard was analyzed at the reporting limit to ensure instrument sensitivity. Samples ND.
NMInt Due to matrix interference, the matrix spike and/or matrix spike duplicate performed on this sample did not meet laboratory acceptance criteria.
NMout The matrix spike and/or matrix spike duplicate performed on this sample did not meet laboratory acceptance criteria.
NRPDo The RPD/precision of replicate analyses performed on this sample did not meet laboratory acceptance criteria.
QMint Due to matrix interference, the MS and/or MSD did not meet laboratory acceptance criteria.
QMout MS and/or MSD recovery did not meet laboratory acceptance criteria.
Qraw Based on raw data excluding numerical rounding, QC recovery was within laboratory acceptance criteria.
QRPD The RPD value for the sample duplicate or MS/MSD did not meet laboratory acceptance criteria.
ND: Analyte NOT DETECTED at or above the Method Detection Limit (if MDL is reported), otherwise at or above the Reportable Detection Limit (RDL)
NR: Not Reported
RDL: Reportable Detection Limit
MDL: Method Detection Limit

* / (Non-NELAP): NELAP does not offer accreditation for this analyte/method/matrix combination

--- Please respond above this line ---

RE: Public Records Request, Reference # C000067-092222

Dear Paul Robinson,

The Office of the City Clerk acknowledges your Public Records Act Request received on September 22, 2022. The following records have been requested:

Building Permit records for 2895 S Main Street, Corona, CA.

The City has conducted a thorough search and has found that there are no documents in response to your request.

If you have any questions, please simply reply to this message or contact the Office of the City Clerk at (951) 736-2201.

Sincerely,

Taylor York
City Clerk Services Specialist

To monitor the progress or update this request please log into the [Public Records Request Center](#)
