## **EXECUTIVE SUMMARY**

This Phase I Environmental Site Assessment (ESA) was performed in accordance with Terracon Proposal No. PLA227126 dated May 23, 2022 and was conducted consistent with the procedures included in ASTM E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The ESA was conducted under the supervision or responsible charge of Jennifer S. Van, Environmental Professional. Maria S. Maternowski performed the site reconnaissance on September 27, 2022.

### **Findings and Opinions**

A summary of findings is provided below. It should be recognized that details were not included or fully developed in this section, and the report must be read in its entirety for a comprehensive understanding of the items contained herein.

#### Site Description and Use

The site is located at 430 West Foothill Parkway in Corona, Riverside County, California and consists of three contiguous parcels (Riverside County Assessor Parcel Numbers 1140-700-20, 1140-700-21 and 1140-700-22) totaling approximately 5.19-acres. The site consists of primarily vacant land with asphalt-paved areas and utilities. At the time of the site reconnaissance, the site was unoccupied.

#### Historical Information

Based on a review of historical information, the site consisted of undeveloped and/or vacant land in 1902, and by the early 1930s was developed with the surrounding properties for agricultural use. The site became vacant in the early 1990s and has since remained vacant, with a portion on the southeast of the site paved with the existing asphalt area in the early 2000s.

The properties surrounding the site were similarly undeveloped in the early 1900s, with Chase Drive abutting the site to the north. The property to the north was developed with an apparent agriculture-related structure and agricultural fields to the north, east, and south from the 1930s until the early 1990s. To the north of the site, Chase Drive was redeveloped as West Foothill Boulevard abutting the site to the north by 2002, followed by the existing single-family residential dwellings. The property to the east was redeveloped in the late 1990s with the existing multi-tenant shopping center with an asphalt-paved parking lot. The property to the west of the site was developed with apparent agriculture-related structures in the 1930s that were converted to commercial and retail use by the early 2000s. The southwestern adjoining property was redeveloped with the existing Dubrina Way followed by single-family residential dwellings. Based on review of historical documentation, recognized environmental conditions (RECs) were not identified in connection with the site.

## Phase I Environmental Site Assessment

Ivy at Mountain Gate ■ Corona, California

October 13, 2022 (Revised: April 25, 2023) ■ Terracon Project No. LA227126

Historically, the site and surrounding properties has been used for agricultural activities, from at least 1931 through the mid-1990s, which may include the use of pesticides and herbicides. Most currently used agricultural chemicals do not persist for extended periods of time in the environment if applied appropriately; however, some agricultural chemicals persist in the environment, especially if misapplied. In addition, structures indicative of potential mixing of pesticides and/or herbicides were not observed onsite in the historical aerial photographs reviewed. In Terracon's experience, the application of herbicides and pesticides to agricultural fields can leave trace amounts of the compounds in the soil and/or groundwater; however, these residual amounts are generally below risk-based screening levels. Pesticide and/or herbicide misuse or vegetative stress were not observed on the site during the site reconnaissance.

### Records Review

Selected state and federal environmental regulatory databases as well as responses from state and local regulatory agencies were reviewed. The site was not identified in the regulatory databases.

The remaining facilities listed in the database report do not appear to represent RECs to the site at this time based upon regulatory status, apparent topographic gradient, and/or distance from the site.

### Site Reconnaissance

At the time of the site reconnaissance, 20 cubic-yards of trash/debris, former utility boxes and a drain were observed on the site. The aforementioned features do not represent a REC to the site.

### Adjoining Properties

The northern adjoining property consists of single-family residential homes (2845-2880 Rosebud Circle and 2865-2895 Olivewood Circle). The eastern adjoining property consists of a multi-tenant retail building consisting of 9Round, Kona Cleaners and Wells Fargo (330 West Foothill Parkway), a multi-tenant retail building consisting of Pizza Hut, Great Clips and Dentist (360 West Foothill Boulevard). The southern adjoining property consists of asphalt-paved parking lot. The western adjoining property consists of single-family homes (503, 510 Panther Drive), The Wood Work Shop (570 West Foothill Parkway). Kona Cleaners (330 West Foothill Parkway), was identified as a drop-off dry-cleaning location, with no dry-cleaning operations performed. RECs were not observed with the adjoining properties.

### Additional Services

Per the agreed scope of services specified in the proposal, the following additional services were performed:

- Radon Records Review
- Wetland Records Review

Findings for the additional services are as follows:

- Based on the published radon risk levels for the county, the site is located in EPA Zone 2, which has a predicted average indoor screening level of between 2 picoCuries of radon per liter of air (pCi/L) and 4 pCi/L. Based on this information, the site is considered to have a moderate potential for elevated indoor concentrations of radon gas.
- Based on a review of the National Wetlands Inventory database, the site is not currently located on federally-designated wetlands.

### **Significant Data Gaps**

Significant data gaps were not identified in connection with the site.

### **Conclusions**

We have performed a Phase I Environmental Site Assessment consistent with the procedures included in ASTM practice E 1527-13 of 430 West Foothill Parkway, Corona, Riverside County, California, the site. Recognized Environmental Conditions (RECs) or Controlled Recognized Environmental Conditions (CRECs) were not identified in connection with the site.

### **Recommendations**

Based on the scope of services, limitations, and conclusions of this assessment, Terracon did not identify RECs or CRECs. As such, no additional investigation is warranted at this time. However, based on the former agricultural use, if soil is to be disturbed during future construction activities, proper procedures should be followed with respect to worker health and safety, and any affected soil encountered should be properly managed and disposed in accordance with local and state regulations, through the implementation of a soil management plan (SMP).

## 1.0 INTRODUCTION

### 1.1 Site Description

<b>Site Name</b>	Ivy at Mountain Gate
<b>Site Location/Address</b>	430 West Foothill Parkway, Corona, Riverside County, California. (Riverside County Assessor Parcel Numbers 1140-700-20, 1140-700-21 and 1140-700-22)
<b>Land Area</b>	Approximately 5.19-acres
<b>Site Improvements</b>	Site consists of primarily vacant land and asphalt-paved areas.
<b>Anticipated Future Site Use</b>	Residential use
<b>Reason for the ESA</b>	Redevelopment of the site

The location of the site is depicted on Exhibit 1 of Appendix A, which was reproduced from a portion of the USGS 7.5-minute series topographic map. The site and adjoining properties are depicted on the Site Diagram, which is included as Exhibit 2 of Appendix A. Acronyms and terms used in this report are described in Appendix F.

### 1.2 Scope of Services

This Phase I ESA was performed in accordance with Terracon Proposal No. PLA227126 dated May 23, 2022 and was conducted consistent with the procedures included in ASTM E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The purpose of this ESA was to assist the client in developing information to identify RECs in connection with the site as reflected by the scope of this report. This purpose was undertaken through user-provided information, a regulatory database review, historical and physical records review, interviews, including local government inquiries, as applicable, and a visual noninvasive reconnaissance of the site and adjoining properties. Limitations, ASTM deviations, and significant data gaps (if identified) are noted in the applicable sections of the report.

ASTM E1527-13 contains a new definition of "migrate/migration," which refers to "the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface." By including this explicit reference to migration in ASTM E1527-13, the Standard clarifies that the potential for vapor migration should be addressed as part of a Phase I ESA. This Phase I ESA has considered vapor migration in evaluation of RECs associated with the site.

As requested by the client, the following additional services were performed:

- Radon Records Review
- Wetland Records Review

### **1.3 Standard of Care**

This ESA was performed in accordance with generally accepted practices of this profession, undertaken in similar studies at the same time and in the same geographical area. We have endeavored to meet this standard of care, but may be limited by conditions encountered during performance, a client-driven scope of work, or inability to review information not received by the report date. Where appropriate, these limitations are discussed in the text of the report, and an evaluation of their significance with respect to our findings has been conducted.

Phase I ESAs, such as the one performed at this site, are of limited scope, are noninvasive, and cannot eliminate the potential that hazardous, toxic, or petroleum substances are present or have been released at the site beyond what is identified by the limited scope of this ESA. In conducting the limited scope of services described herein, certain sources of information and public records were not reviewed. It should be recognized that environmental concerns may be documented in public records that were not reviewed. No ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs. No warranties, express or implied, are intended or made. The limitations herein must be considered when the user of this report formulates opinions as to risks associated with the site or otherwise uses the report for any other purpose. These risks may be further evaluated – but not eliminated – through additional research or assessment. We will, upon request, advise you of additional research or assessment options that may be available and associated costs.

### **1.4 Additional Scope Limitations, ASTM Deviations and Data Gaps**

Based upon the agreed-on scope of services, this ESA did not include subsurface or other invasive assessments, vapor intrusion assessments or indoor air quality assessments (i.e. evaluation of the presence of vapors within a building structure), business environmental risk evaluations, or other services not particularly identified and discussed herein. Credentials of the company (Statement of Qualifications) have not been included in this report but are available upon request. Pertinent documents are referred to in the text of this report, and a separate reference section has not been included. Reasonable attempts were made to obtain information within the scope and time constraints set forth by the client; however, in some instances, information requested is not, or was not, received by the issuance date of the report. Information obtained for this ESA was received from several sources that we believe to be reliable; nonetheless, the authenticity or reliability of these sources cannot and is not warranted hereunder. This ESA was further limited by the following:

- At the issuance of this report, responses had not yet been received from Riverside County Land Use or the Riverside County Fire Marshal for records pertaining to the site. Based on the available historical and regulatory information, this does not represent a significant data gap to the site.

An evaluation of the significance of limitations and missing information with respect to our findings has been conducted, and where appropriate, significant data gaps are identified and discussed in the text of the report. However, it should be recognized that an evaluation of significant data gaps is based on the information available at the time of report issuance, and an evaluation of information received after the report issuance date may result in an alteration of our conclusions, recommendations, or opinions. We have no obligation to provide information obtained or discovered by us after the issuance date of the report, or to perform any additional services, regardless of whether the information would affect any conclusions, recommendations, or opinions in the report. This disclaimer specifically applies to any information that has not been provided by the client.

This report represents our service to you as of the report date and constitutes our final document; its text may not be altered after final issuance. Findings in this report are based upon the site's current utilization, information derived from the most recent reconnaissance and from other activities described herein; such information is subject to change. Certain indicators of the presence of hazardous substances or petroleum products may have been latent, inaccessible, unobservable, or not present during the most recent reconnaissance and may subsequently become observable (such as after site renovation or development). Further, these services are not to be construed as legal interpretation or advice.

## **1.5 Reliance**

This ESA report is prepared for the exclusive use and reliance of Oakmont Management Group LLC and Welltower, Inc. Use or reliance by any other party is prohibited without the written authorization of Oakmont Management Group LLC, and Terracon Consultants, Inc. (Terracon).

Reliance on the ESA by the client and all authorized parties will be subject to the terms, conditions and limitations stated in the proposal, ESA report, and Terracon's Agreement. The limitation of liability defined in the Agreement is the aggregate limit of Terracon's liability to the client and all relying parties.

Continued viability of this report is subject to ASTM E1527-13 Sections 4.6 and 4.8. If the ESA will be used by a different user (third party) than the user for whom the ESA was originally prepared, the third party must also satisfy the user's responsibilities in Section 6 of ASTM E1527-13.

## 1.6 Client Provided Information

### 3.0 HISTORICAL USE INFORMATION

Terracon reviewed the following historical sources to develop a history of the previous uses of the site and surrounding area, in order to help identify RECs associated with past uses. Copies of selected historical documents are included in Appendix C.

#### 3.1 Historical Topographic Maps, Aerial Photographs, Sanborn Maps

Chino Fabricare Center, Boston Cleaners (330 West Foothill Parkway)

The Chino Fabricare Center and Boston Cleaners facilities are listed as having operated to the adjoining northeast of the site from approximately 2001-2014 and are further discussed in Section 4.1.

### 3.3 Site Ownership

According to the Riverside County Office of the Assessor, the property is currently owned by Corona 1, LLC.

### 3.4 Title Search

At the direction of the client, a title search was not included as part of the scope of services. Unless notified otherwise, we assume that the client is evaluating this information outside the scope of this report.

### 3.5 Environmental Liens and Activity and Use Limitations

At the direction of the client, performance of a review of environmental liens and activity and use limitations was not included as part of the scope of services. The EDR regulatory database report included a review of both Federal and State Engineering Control (EC) and Institutional Control (IC) databases. Based on a review of the database report, the site was not listed on the EC or IC databases.

### 3.6 Interviews Regarding Current and Historical Site Uses

The following individual was interviewed regarding the current and historical use of the site.

#### Interviewee

Interviewer	Name / Phone #	Title	Date/Time
Maria S. Maternowski	Eli Halavi / (310) 963-6878	Owner / Corona 1, LLC	October 6, 2022 2:15pm

Terracon interviewed Mr. Eli Halavi, owner with Corona 1 LLC, subsequent to the site reconnaissance. Mr. Eli Halavi indicated that they have been familiar with the site since 2006, when he purchased it from White Stone Properties and additional entities. Mr. Eli Halavi reported the site has always consisted of vacant land to his knowledge. Mr. Eli Halavi is not aware of petroleum pipelines, water wells, or USTs associated with the site. Mr. Eli Halavi is not aware of pending, threatened and/or past environmental or possible violations of environmental laws, and/or liability. In addition, Mr. Eli Halavi is not aware of environmental concerns with the site or in the site vicinity.

### 3.7 Prior Report Review

Terracon requested the client provide any previous environmental reports they are aware of for the site. Previous reports were not provided by the client to Terracon for review.

## 4.0 RECORDS REVIEW

Regulatory database information was provided by EDR, a contract information services company. The purpose of the records review was to identify RECs in connection with the site. Information in this section is subject to the accuracy of the data provided by the information services company and the date at which the information is updated. The scope herein did not include confirmation of facilities listed as "unmappable" by regulatory databases.

In some of the following subsections, the words up-gradient, cross-gradient and down-gradient refer to the topographic gradient in relation to the site. As stated previously, the groundwater flow direction and the depth to shallow groundwater, if present, would likely vary depending upon

seasonal variations in rainfall and the depth to the soil/bedrock interface. Without the benefit of on-site groundwater monitoring wells surveyed to a datum, groundwater depth and flow direction beneath the site cannot be directly ascertained.

Chino Fabricare Center, Cleaners Club Inc. (330 West Foothill Parkway)

Cleaner's Club Inc. / Chino Fabricare Center, formerly located to the adjoining northeast of the site and in an up-gradient position relative to the site is listed in the EDR Historic Cleaner regulatory database as having operated from approximately 2001-2014. Based on a review of the South Coast Air Quality Management District (SCAQMD) F.I.N.D. online database, Cleaner's Club Inc. / Chino Fabricare Center was not identified with being permitted with any dry-cleaning equipment. Based on a review of the Department of Toxic Substances Control (DTSC) online hazardous waste tracking system (HWTS) online database, Cleaner's Club Inc. / Chino Fabricare Center were not identified. Additionally, at the time of the site reconnaissance, Terracon observed the current dry-cleaning facility at this property shipping clothing off-site for dry-cleaning. Based on facility's regulatory status, visual observations, lack of waste streams and lack of dry-cleaning equipment, Cleaner's Club Inc. / Chino Fabricare Center does not represent a REC to the site.

Foothill Property, Main Ranch, Temescal Ranch, Wild Rose Ranch (510 West Foothill Parkway / 510 West Chase Drive)

Foothill Property, Main Ranch, Temescal Ranch and Wild Rose Ranch, located down-gradient to the adjoining west of the site, is listed in the Leaking Underground Fuel Tank Report (GEOTRACKER) (LUST), SWEEPS UST Listing (SWEEPS UST), Facility Inventory Database (CA FID UST), "Cortese" Hazardous Waste & Substances Sites List (CORTESE), Hazardous Waste & Substance Site List (HIST CORTESE), and CalEPA Regulated Site Portal Data (CERS) regulatory databases. In a November 1995 document from the County of Riverside Assessor's Office, the Foothill Partners Property at 510 West Foothill Parkway was identified as the former Foothill Ranch facility listed at 510 West Chase Drive and presumably includes the Temescal, Wild Rose, and Main Ranch properties listed at the same historical address with an historic UST.

Based on a review of the LUST case associated with this property, a former 10,000-gallon gasoline fuel tank was identified on this property, located approximately 320 feet to the west of the site. Based on a review of documents for the LUST case, the tank was removed in October of 1995 and the remaining piping associated with the tank was removed in November of 1995. A 0.5-inch diameter hole was observed in the piping approximately 12 feet south of former UST location and soil samples collected below this leak identified contamination. Additional removal of approximately 73 tons of contaminated soil was completed in January of 1996 and 7 samples were taken from the location of the identified leak location. These samples were analyzed for total petroleum hydrocarbons-gasoline (TPH-g), benzene, toluene, ethylbenzene and xylene (BTEX), and methyl tertiary-butyl ether (MTBE) were not detected at limits that meet current applicable environmental screening levels (ESLs) (San Francisco Bay Water Quality Control Board, 2019). The LUST case was granted closure in February of 1996. Based on this information as well as the distance and down-gradient position relative to the site, the former LUST case associated with 510 West Foothill Parkway and 510 West Chase Drive does not represent a REC to the site.

Albertson's (260 West Foothill Parkway)

Albertson's Supermarket, located approximately 110 feet east of the site and in a topographic cross-gradient position relative to the site, is identified in the CERS, CERS HAZ WASTE, HAZNET, HWTS, and RCRA – VSQG regulatory databases. Based on a review of the HWTS listing, this facility was a permitted generator of hazardous waste streams from 2013-2021 including Alkaline Solution (pH $\geq$  12.5) without Metals (2013-2015, 2018-2019), Aqueous Solution (2 < pH < 12.5) Containing Reactive Anions (2013, 2015), Unspecified Solvent Mixture (2013-2017), Pesticides/Pesticide Production Waste (2014-2015, 2018-2019), Pharmaceutical Waste (2013-2020), Off-Spec, Aged, or Surplus Organics (2014-2020), Liquids with pH $\leq$ 2 (2013-2020). Based on a review of the CERS listing, the facility stores Retail Hazardous Wastes including Refrigerants, Propane, Lead Acid Batteries, and Helium. The listing does not indicate any violations or releases associated with this facility. Based on the facility's regulatory status, waste streams identified and apparent grocery store operations, this facility does not represent a REC to the site.

The remaining facilities listed in the database report do not appear to represent RECs to the site at this time based upon regulatory status, apparent topographic gradient, and/or distance from the site.

Unmapped facilities are those that do not contain sufficient address or location information to evaluate the facility listing locations relative to the site. The report listed five facilities in the unmapped section. Determining the location of unmapped facilities is beyond the scope of this assessment; however, none of these facilities were identified as the site or adjacent properties. These facilities are listed in the database report in Appendix D.

## 4.3 Local Area Knowledge

Based on a review of the California Department of Conservation, Geologic Energy Management Division well finder website ([CalGEM GIS](#)), the site is not identified within an oil field and there are no active or plugged oil production wells located at the site or adjoining properties.

Terracon researched on-line at the State Resources Water Control Board (SRWCB) GeoTracker database – Land Disposal Sites and landfills were not identified on-site or in the site vicinity.

### Site Operations, Processes, and Equipment

#### Other processes or equipment

At the time of the site reconnaissance, two former utility boxes, submerged into the ground and lined with concrete were observed on the southern portion of the site. No evidence of chemical waste disposal, noxious odors, or other releases were observed near the vicinity of the former utility boxes. Based on visual observations, the former utility boxes do not represent a REC to the site.

### Releases or Potential Releases

#### Trash, debris and/or other waste materials

Trash and debris were observed along the eastern portion of the site during the site reconnaissance. Based on visual observation (only of surface materials) approximately 20 cubic yards of debris, which consisted of tires, plastic, wood and plastic bags was observed. Leakage, spills or other releases from these materials were not observed during the visual reconnaissance. The debris materials did not appear to be hazardous in nature.

## 6.0 ADJOINING PROPERTY RECONNAISSANCE

Visual observations of adjoining properties (from site boundaries) are summarized below.

### Adjoining Properties

Direction	Description
North	The northern adjoining property consists of single-family residential homes (2845-2880 Rosebud Circle and 2865-2895 Olivewood Circle).
East	The eastern adjoining property consists of a multi-tenant retail building consisting of 9Round, Kona Cleaners and Wells Fargo (330 West Foothill Parkway), a multi-tenant retail building consisting of Pizza Hut, Great Clips and Dentist (360 West Foothill Boulevard).
South	The southern adjoining property consists of asphalt-paved parking lot.
West	The western adjoining property consists of single-family homes (503, 510 Panther Drive), The Wood Work Shop (570 West Foothill Parkway).

RECs were not observed with the adjoining properties.

## 7.0 ADDITIONAL SERVICES

Per the agreed scope of services specified in the proposal, the following additional services (e.g. Radon Records Review and Wetland Records Review) were conducted.

### 7.1 Radon Records Review

Radon is a naturally occurring radioactive gas produced through the natural decay of uranium to stable lead. It is odorless, tasteless, and invisible. Elevated concentrations of radon can be found in soils and rocks containing uranium, granite, shale, phosphate, and pitchblende. Locations of these materials are highly unpredictable. Elevated levels of radon may also be found in soils containing certain types of industrial wastes, such as the by-products from uranium or phosphate mining. Radon can accumulate inside structures at concentrations that may pose risks to human health. Indoor radon levels are influenced by building construction and the concentration of radon in the underlying soil.

Terracon reviewed the Radon Zone Map prepared by the United States Environmental Protection Agency (US EPA) to identify the site location in terms of potential for average indoor radon concentrations. The study indicated the site is located in EPA Zone 2, which has a predicted average indoor screening level of between 2 pCi/L of radon per liter of air (pCi/L) and 4 pCi/L. The EPA recommends a guideline action level of 4.0 pCi/L for annual average indoor radon concentrations in residential properties. The action level is based on an exposure of 18 hours per day for 40 years. According to a U.S. Department of Energy environmental assessment, radon is much less of a concern in commercial buildings than in residential buildings as these buildings usually have mechanical ventilation and occupants are typically not in the buildings as many hours a week as they are in their homes. No action level has been established for commercial buildings or occupational exposure.

The average residential radon concentration from the study for Riverside County 0.117 pCi/L, and the maximum identified concentration is 0.45 pCi/L in the first and second floors of homes. The study included tests in 12 homes in Riverside County, 0% of which exceeded the EPA action level.

Based on this information, the site is considered to have a moderate potential for elevated indoor concentrations of radon gas. However, testing would be required to evaluate site-specific concentrations of radon gas.

## **7.2 Wetland Records Review**

The U.S. Army Corps of Engineers (USACE) regulates jurisdictional wetlands and other waters of the U.S. under Section 10 of the Rivers and Harbors Act and Section 404 of the Clean Water Act. Terracon conducted a limited desktop review of the site to identify areas mapped by the resources below as potentially exhibiting characteristics of wetlands and/or other waterbodies that may be subject to regulation under the USACE. This review may not identify state/locally-designated wetlands. This desktop review is not a thorough review of wetlands and may not identify all resources present.

Terracon reviewed the following resources to identify areas mapped as indicating the potential presence of jurisdictional waters of the U.S., including wetlands, on the site:

- **Topographic Map**

The United States Geologic Survey (USGS) 7.5-Minute Topographic Map of the subject site was reviewed to identify drainages or other potential waters of the U.S. within the project site. A portion of the Topographic Quadrangle can be seen as Exhibit 1 in Appendix A. Based on the USGS map, water bodies are not depicted to occur on the site.

- **National Wetland Inventory Map**

National Wetland Inventory (NWI) data for the project site was reviewed to identify potential wetland areas. NWI data for the project site was published by the U.S. Department of the Interior's Fish and Wildlife Service and depicts possible wetland areas based on stereoscopic analysis of high-altitude aerial photographs. The review of the NWI data does not identify potential wetland areas located within the project site. The NWI map data for the project area can be seen as Exhibit 3 in Appendix A.

Terracon's desktop review of the above resources did not identify mapped wetlands or other potentially jurisdictional waters of the U.S. on the site. Please note that there may be wetlands not identified on the resources reviewed. This Limited Wetland Review does not constitute a formal determination and/or delineation of a potentially jurisdictional wetland, which requires (among other procedures) a formal field investigation including hand-dug soil stations with vegetation and hydrologic indicators identification, as set forth in *1987 Corps of Engineers Wetland Delineation*

**Phase I Environmental Site Assessment**

Ivy at Mountain Gate ■ Corona, California

October 13, 2022 (Revised: April 25, 2023) ■ Terracon Project No. LA227126

*Manual* and further amended by the applicable *Regional Supplements to the Corps of Engineers Wetland Delineation Manual*.

To obtain a formal determination from the USACE regarding jurisdictional status, a wetland/waters of the U.S. delineation could be conducted by a wetland scientist and submitted to the USACE (or in certain geographies the participating state agency) for a jurisdictional determination. Note that the USACE is not required to respond to determination requests within a particular timeframe unless the submittal also includes a permit application.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1921 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

### RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Target Property Map:	12015885 CORONA SOUTH, CA
Version Date:	2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **HYDROGEOLOGIC INFORMATION**

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. ## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

## **APPENDIX F**

### **LIST OF TERMS AND ACRONYMS**

## Description of Selected General Terms and Acronyms

Term/Acronym	Description
ACM	<p>Asbestos Containing Material. Asbestos is a naturally occurring mineral, three varieties of which (chrysotile, amosite, crocidolite) have been commonly used as fireproofing or binding agents in construction materials. Exposure to asbestos, as well as ACM, has been documented to cause lung diseases including asbestosis (scarring of the lung), lung cancer and mesothelioma (a cancer of the lung lining).</p> <p>Regulatory agencies have generally defined ACM as a material containing greater than one (1) percent asbestos, however some states (e.g. California) define ACM as materials having 0.1% asbestos. In order to define a homogenous material as non-ACM, a minimum number of samples must be collected from the material dependent upon its type and quantity. Homogenous materials defined as non-ACM must either have 1) no asbestos identified in all of its samples or 2) an identified asbestos concentration below the appropriate regulatory threshold. Asbestos concentrations are generally determined using polarized light microscopy or transmission electron microscopy. Point counting is an analytical method to statistically quantify the percentage of asbestos in a sample. The asbestos component of ACM may either be friable or non-friable. Friable materials, when dry, can be crumbled, pulverized, or reduced to powder by hand pressure and have a higher potential for a fiber release than non-friable ACM. Non-friable ACM are materials that are firmly bound in a matrix by plastic, cement, etc. and, if handled carefully, will not become friable.</p> <p>Federal and state regulations require that either all suspect building materials be presumed ACM or that an asbestos survey be performed prior to renovation, dismantling, demolition, or other activities that may disturb potential ACM. Notifications are required prior to demolition and/or renovation activities that may impact the condition of ACM in a building. ACM removal may be required if the ACM is likely to be disturbed or damaged during the demolition or renovation. Abatement of friable or potentially friable ACM must be performed by a licensed abatement contractor in accordance with state rules and NESHAP. Additionally, OSHA regulations for work classification, worker training and worker protection will apply.</p>
AHERA	Asbestos Hazard Emergency Response Act
AST	Aboveground Storage Tanks. ASTs are generally described as storage tanks less than 10% of which are below ground (i.e., buried). Tanks located in a basement, but not buried, are also considered ASTs. Whether, and the extent to which, an AST is regulated, is determined on a case-by-case basis and depends upon tank size, its contents and the jurisdiction of its location.
BGS	Below Ground Surface
Brownfields	State and/or tribal listing of Brownfield properties addressed by Cooperative Agreement Recipients or Targeted Brownfields Assessments.
BTEX	Benzene, Toluene, Ethylbenzene, and Xylenes. BTEX are VOC components found in gasoline and commonly used as analytical indicators of a petroleum hydrocarbon release.
CERCLA	Comprehensive Environmental Response, Compensation and Liability Act (a.k.a. Superfund). CERCLA is the federal act that regulates abandoned or uncontrolled hazardous waste sites. Under this Act, joint and several liability may be imposed on potentially responsible parties for cleanup-related costs.
CERCLIS	Comprehensive Environmental Response, Compensation and Liability Information System. An EPA compilation of sites having suspected or actual releases of hazardous substances to the environment. CERCLIS also contains information on site inspections, preliminary assessments and remediation of hazardous waste sites. These sites are typically reported to EPA by states and municipalities or by third parties pursuant to CERCLA Section 103.
CESQG	Conditionally Exempt Small Quantity Generators
CFR	Code of Federal Regulations

## Description of Selected General Terms and Acronyms

Term/Acronym	Description
CREC	Controlled Recognized Environmental Condition is defined in ASTM E1527-13 as “a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority) , with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). A condition considered by the environmental professional to be a controlled recognized environmental condition shall be listed in the findings section of the Phase I Environmental Site Assessment report, and as a recognized environmental condition in the conclusions section of the Phase I Environmental Site Assessment report.”
DOT	U.S. Department of Transportation
EPA	U.S. Environmental Protection Agency
ERNS	Emergency Response Notification System. An EPA-maintained federal database which stores information on notifications of oil discharges and hazardous substance releases in quantities greater than the applicable reportable quantity under CERCLA. ERNS is a cooperative data-sharing effort between EPA, DOT, and the National Response Center.
ESA	Environmental Site Assessment
FRP	Fiberglass Reinforced Plastic
Hazardous Substance	As defined under CERCLA, this is (A) any substance designated pursuant to section 1321(b)(2)(A) of Title 33, (B) any element, compound, mixture, solution, or substance designated pursuant to section 9602 of this title; (C) any hazardous waste having characteristics identified under or listed pursuant to section 3001 of the Solid Waste Disposal Act (with some exclusions); (D) any toxic pollutant listed under section 1317(a) of Title 33; (E) any hazardous air pollutant listed under section 112 of the Clean Air Act; and (F) any imminently hazardous chemical substance or mixture with respect to which the EPA Administrator has taken action under section 2606 of Title 15. This term does not include petroleum, including crude oil or any fraction thereof which is not otherwise listed as a hazardous substance under subparagraphs (A) through (F) above, and the term include natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas).
Hazardous Waste	This is defined as having characteristics identified or listed under section 3001 of the Solid Waste Disposal Act (with some exceptions). RCRA, as amended by the Solid Waste Disposal Act of 1980, defines this term as a “solid waste, or combination of solid wastes, which because of its quantity, concentration, or physical, chemical, or infectious characteristics may (A) cause, or significantly contribute to an increase in mortality or an increase in serious irreversible, or incapacitating reversible illness; or (B) pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported, or disposed of, or otherwise managed.”
HREC	Historical Recognized Environmental Condition is defined in ASTM E1527-13 as “a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a historical recognized environmental condition, the environmental professional must determine whether the past release is a recognized environmental condition at the time of the Phase I Environmental Site Assessment is conducted (for example, if there has been a change in the regulatory criteria). If the EP considers the past release to be a recognized environmental condition at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a recognized environmental condition.”

## Description of Selected General Terms and Acronyms

Term/Acronym	Description
IC/EC	A listing of sites with institutional and/or engineering controls in place. IC include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls. EC include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.
ILP	Innocent Landowner/Operator Program
LQG	Large Quantity Generators
LUST	Leaking Underground Storage Tank. This is a federal term set forth under RCRA for leaking USTs. Some states also utilize this term.
MCL	Maximum Contaminant Level. This Safe Drinking Water concept (and also used by many states as a ground water cleanup criteria) refers to the limit on drinking water contamination that determines whether a supplier can deliver water from a specific source without treatment.
MSDS	Material Safety Data Sheets. Written/printed forms prepared by chemical manufacturers, importers and employers which identify the physical and chemical traits of hazardous chemicals under OSHA's Hazard Communication Standard.
NESHAP	National Emissions Standard for Hazardous Air Pollutants (Federal Clean Air Act). This part of the Clean Air Act regulates emissions of hazardous air pollutants.
NFRAP	Facilities where there is "No Further Remedial Action Planned," as more particularly described under the Records Review section of this report.
NOV	Notice of Violation. A notice of violation or similar citation issued to an entity, company or individual by a state or federal regulatory body indicating a violation of applicable rule or regulations has been identified.
NPDES	National Pollutant Discharge Elimination System (Clean Water Act). The federal permit system for discharges of polluted water.
NPL	The NPL is the EPA's database of uncontrolled or abandoned hazardous waste facilities that have been listed for priority remedial actions under the Superfund Program.
OSHA	Occupational Safety and Health Administration or Occupational Safety and Health Act
PACM	Presumed Asbestos-Containing Material. A material that is suspected of containing or presumed to contain asbestos but which has not been analyzed to confirm the presence or absence of asbestos.
PCB	Polychlorinated Biphenyl. A halogenated organic compound commonly in the form of a viscous liquid or resin, a flowing yellow oil, or a waxy solid. This compound was historically used as dielectric fluid in electrical equipment (such as electrical transformers and capacitors, electrical ballasts, hydraulic and heat transfer fluids), and for numerous heat and fire sensitive applications. PCB was preferred due to its durability, stability (even at high temperatures), good chemical resistance, low volatility, flammability, and conductivity. PCBs, however, do not break down in the environment and are classified by the EPA as a suspected carcinogen. 1978 regulations, under the Toxic Substances Control Act, prohibit manufacturing of PCB-containing equipment; however, some of this equipment may still be in use today.
pCi/L	picoCuries per Liter of Air. Unit of measurement for Radon and similar radioactive materials.
PLM	Polarized Light Microscopy (see ACM section of the report, if included in the scope of services)
PST	Petroleum Storage Tank. An AST or UST that contains a petroleum product.

## Description of Selected General Terms and Acronyms

Term/Acronym	Description
Radon	A radioactive gas resulting from radioactive decay of naturally-occurring radioactive materials in rocks and soils containing uranium, granite, shale, phosphate, and pitchblende. Radon concentrations are measured in picoCuries per Liter of Air. Exposure to elevated levels of radon creates a risk of lung cancer; this risk generally increases as the level of radon and the duration of exposure increases. Outdoors, radon is diluted to such low concentrations that it usually does not present a health concern. However, radon can accumulate in building basements or similar enclosed spaces to levels that can pose a risk to human health. Indoor radon concentrations depend primarily upon the building's construction, design and the concentration of radon in the underlying soil and ground water. The EPA recommended annual average indoor "action level" concentration for residential structures is 4.0 pCi/l.
RCRA	Resource Conservation and Recovery Act. Federal act regulating solid and hazardous wastes from point of generation to time of disposal ('cradle to grave'). 42 U.S.C. 6901 et seq.
RCRA Generators	The RCRA Generators database, maintained by the EPA, lists facilities that generate hazardous waste as part of their normal business practices. Generators are listed as either large (LQG), small (SQG), or conditionally exempt (CESQG). LQG produce at least 1000 kg/month of non-acutely hazardous waste or 1 kg/month of acutely hazardous waste. SQG produce 100-1000 kg/month of non-acutely hazardous waste. CESQG are those that generate less than 100 kg/month of non-acutely hazardous waste.
RCRA CORRACTS/TS Ds	The USEPA maintains a database of RCRA facilities associated with treatment, storage, and disposal (TSD) of hazardous materials which are undergoing "corrective action". A "corrective action" order is issued when there is a release of hazardous waste or constituents into the environment from a RCRA facility.
RCRA Non-CORRACTS/TS Ds	The RCRA Non-CORRACTS/TS Database is a compilation by the USEPA of facilities which report storage, transportation, treatment, or disposal of hazardous waste. Unlike the RCRA CORRACTS/TS database, the RCRA Non-CORRACTS/TS database does not include RCRA facilities where corrective action is required.
RCRA Violators List	RAATS. RCRA Administrative Actions Taken. RAATS information is now contained in the RCRIS database and includes records of administrative enforcement actions against facilities for noncompliance.
RCRIS	Resource Conservation and Recovery Information System, as defined in the Records Review section of this report.
REC	Recognized Environmental Conditions are defined by ASTM E1527-13 as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment; 2) under conditions indicative of a release to the environment. De minimis conditions are not recognized environmental conditions."
SCL	State "CERCLIS" List (see SPL /State Priority List, below).
SPCC	Spill Prevention, Control and Countermeasures. SPCC plans are required under federal law (Clean Water Act and Oil Pollution Act) for any facility storing petroleum in tanks and/or containers of 55-gallons or more that when taken in aggregate exceed 1,320 gallons. SPCC plans are also required for facilities with underground petroleum storage tanks with capacities of over 42,000 gallons. Many states have similar spill prevention programs, which may have additional requirements.
SPL	State Priority List. State list of confirmed sites having contamination in which the state is actively involved in clean up activities or is actively pursuing potentially responsible parties for clean up. Sometimes referred to as a State "CERCLIS" List.
SQG	Small Quantity Generator
SWF/LF	State and/or Tribal database of Solid Waste/Landfill facilities. The database information may include the facility name, class, operation type, area, estimated operational life, and owner.
TPH	Total Petroleum Hydrocarbons
TRI	Toxic Release Inventory. Routine EPA report on releases of toxic chemicals to the environment based upon information submitted by entities subject to reporting under the Emergency Planning and Community Right to Know Act.
